

The Original OEM Manufacturer

For Over 66 Years

Your Single Source!

The Crown 2016 Product catalog

Welcome!...to the Crown family of products

About us...

Crown Engineering Corporation...the Manufacturer!

Crown Engineering Corporation is one of the largest manufacturers of electrodes, flame rods, and probes for ignition related applications regarding oil and gas fired equipment. We manufacture many of the electrodes for today's waste oil burners. Our ignition electrodes can be found in **Beckett AFII** burners, **Wayne Blue Angel** oil burners, **Carlin's Elite** oil burners, **Midco** power gas burners, **Wayne** power gas burners, **Fulton** boilers, and **Kewanee** boilers. We have designed and supplied ignition products for grain drying equipment. Our products can even be found in hot water heaters, pressure washers, and diesel truck heaters, of all places!

Crown Engineering Corporation is also a manufacturer of terminal connectors. Our connectors are used in power source applications between electrode and transformer. We also manufacture connector to connector cable assemblies for **Fulton Boiler Co.**

Crown Engineering Corporation...the Distributor!

In addition to manufacturing electrodes and terminals for our customers we are swamped with numerous requests for other related products. We rose to the demands of our customers needs. After we began our, "Single Source!", campaign, it lead to an onslaught of numerous distribution items. These products range from industrial igniters, couplers, putty, gauge glass and fractional v-belts.

In Closing...

Crown Engineering is proud to present our 2016 Product Catalog, featuring over 1800 different cataloged products. Take the time to look through it. This is our most informative and organized edition ever! Our OEM electrode section has extras, such as, OEM part numbers and model number information, and updated photos and line art for many of the old Crown favorites have been added, and continuous page numbers with Section numbers instead of alpha sections. Our "on edge description tabs," makes thumbing through sections easier than ever. So, don't judge our book by it's cover! Literally! Take a look inside, there's more!.

We graciously welcome you, and thank you for choosing our company as a source of supply. We hope to serve you humbly for many years to come. If at any time you are not completely satisfied with the product(s), and service we offer, please do not hesitate to openly discuss the problem with us. With Crown there is never a problem that cannot be solved. We think of you as more than just a customer...we treat all our customers like family!. We look forward to hearing from you.

Sincerely,

Michael J. Palmer
President

Part Number: 100950K
 Wayne Blue Angel + tune up kit-6" air tube
Packaging: Poly bag hang card

- Includes**
- 1 - Electrode assembly (100989-013)
 - 1 - Setting gauge (14200-002)
 - 1 - Oil line 3/16" X 8" L (14452)
 - 1 - Coupler w/end caps (100386)
 - 1 - Elbow (13494)
 - 1 - Buss bar support (13276)

For use on Blue Angel Plus burner model HS up to 6" air tube.

Part Number: 28091K
 Weil-McLain tune up kit QB180/300
Packaging: Poly bag hang card

- Includes**
- 1 - 28091-01 Electrode assembly (644-600-048)
 - 2 - 70043 Wire ignition leads (644-000-043)
 - 1 - Oil line - straight 3/16" X 11" (40362B)
 - 1 - KK500WM Coupler with end caps (644-700-186)
 - 1 - Instruction sheet

For use on burner models QB-180 & 300

Part Number: 100989K
 Wayne Blue Angel + tune up kit-over 6" air tube
Packaging: Poly bagged & Tagged

- Includes**
- 1 - Electrode assembly (100989-061)
 - 1 - Setting gauge (14200-002)
 - 1 - Oil line 3/16" X 8" L (14452)
 - 1 - Coupler w/end caps (100386)
 - 1 - Elbow (13494)
 - 1 - Buss bar support (13276)

For use on Blue Angel Plus burner model HS over 6" air tubes.

Part Number: 31156K
 Wayne tune up kit - E & M Series
Packaging: Poly bag hang card

- Includes**
- 2 - Electrode assemblies (13286)
 - 2 - Electrode Stems (12550)
 - 2 - Buss bars 8" (10004-015)
 - 2 - Insulator bushings (12408)
 - 1 - Oil line 3/16" X 8" L (14452)
 - 1 - Coupler w/end caps (13279)
 - 1 - Setting gauge (14200)
 - 1 - Elbow (13494)
 - 1 - Buss bar support (13276)
 - 1 - Instruction sheet

For use on burner models M, MSR, MH, ERA, EH, EHA, EHASR, OE, & OEA.

Part Number: 31157K
 Wayne tune up kit - Old HS
Packaging: Poly bag hang card

- Includes**
- 1 - Electrode w/buss bar (21666-013)
 - 1 - Electrode w/buss bar (21667-013)
 - 1 - Setting gauge (14200-002)
 - 1 - Oil line 3/16" X 8" L (14452)
 - 1 - Coupler w/end caps (100386)
 - 1 - Elbow (13494)
 - 1 - Buss bar support (13276)
 - 1 - Instruction sheet

For use on OLD Blue Angel burner model HS

NOTE: This kit excludes the electrode bracket holder Wayne P/N: 21679, which is usually reused when servicing. If you would like a kit that includes the electrode holder please order our P/N: **31157KH**

Part Number: 21705U
 Beckett Igniton Leads Set
Packaging: Poly bagged

- Includes**
- 1 - Set of ignition leads
- For use on burner models AF II
 1/4" quick connect transformer wires.

Section 2 - Tune-up Kits & Service Parts

Part Number: 40261
 Adams/Beckett electrode kit
Packaging: Poly bag with label
Includes
 1 - 20070 Electrode assembly
 1 - 20417 Flame rod assembly
 For use on G2 gas burners.

Part Number: 40263
 Powerflame electrode kit
Packaging: Poly bag with label
Includes
 1 - 26887 Electrode assembly
 1 - 26894 Flame rod assembly
 Used on Columbia boilers.

Adams Manufacturing Electrode Set P/N: 40261
 Used in Beckett models G2 gas burners.

Power Flame Electrode Set P/N: 40263
 Used in burner models C, J, & CG

Part Number: 40262
 Patterson-Kelley electrode kit
Packaging: Poly bag with label
Includes
 1 - 26796 Electrode assembly
 1 - 26798 Flame rod assembly
 For use on burner models
 N-700 thru N-2000

Part Number: 40264
 Wayne electrode kit HSG200/400
Packaging: Poly bag with label
Includes
 1 - 28045 Flame rod assembly
 1 - 28047 Electrode assembly
 For use on burner models HSG200 & 400

Patterson-Kelley Electrode Set P/N: 40262
 Used in burner models N-700 thru N-2000

Wayne Electrode Set P/N: 40264
 Used in burner models HSG200 & HSG400

Part Number: 40275

Electrode ignition Kit - "PRO" kit

Packaging: Durable plastic carrying case

Includes

This kit contains a variety of ignition terminals, standard electrodes, popular OEM electrodes, and other necessary accessories to get burners up and running. Don't leave the shop without it!

Terminals and Hardware

Quantity	Contents
10 ea.	50000 Cage terminal
10 ea.	50100 Spring terminal
10 ea.	50200 Ring terminal
10 ea.	50450 Right angle cage terminal
10 ea.	50600 Stud ferrule
10 ea.	50760 Hex base stud 6-32 thread.
10 ea.	50700 Hex base stud 10-32 thread.
5 ea.	50860 Hollow stud 6-32 thread.
5 ea.	50800 Hollow stud 10-32 thread.
10 ea.	50900 Eyelet
10 ea.	60018 Flat hex nut 6-32 thread.
10 ea.	60022 Flat hex nut 10-32 thread.

Special OEM Electrodes

Quantity	Contents
2 ea.	20410 Beckett
2 ea.	20780 Carlin
2 ea.	28022 Wayne

Special Tools

Quantity	Contents
1 ea.	40430 Igniter tip bending set
1 ea.	40445 Electrode setting gauge

Buss Bars

Quantity	Contents
2 ea.	40315 Round buss bar - 12" long
2 ea.	40320 Flat buss bar - 12" long

Standard Electrodes

Quantity	Contents
4 ea.	01041
2 ea.	03050
2 ea.	04040
4 ea.	05040
4 ea.	05050
2 ea.	05060
2 ea.	06040
2 ea.	06042
2 ea.	06050
2 ea.	06060

Test Jumpers, Cable, and Chart

Quantity	Contents
1 ea.	40630 Set of booted test leads
1 ea.	5 ft. length GTO-15 ignition cable
1 ea.	Trouble shooting chart

Section 2 - Tune-up Kits & Service Parts

Part Number: 40277
 Electrode roll-up kit "MECHANIC"
Packaging: Durable plastic roll-up pouch

Includes
 This kit includes 8 different standard electrodes, and 2 - O.E.M. electrode assemblies designs. It also contains 10 of the most universal insulators in the oil heat industry to restore service due to electrode or insulator failure.
 Contains the following parts:

<u>Standard electrodes</u>	<u>Insulators</u>
2 ea. 05040	2 ea. 11041
2 ea. 05050	2 ea. 15040
2 ea. 05060	2 ea. 15050
2 ea. 06050	2 ea. 15060
	2 ea. 16050

O.E.M. electrode
 2 ea. 20411 Beckett
 2 ea. 20418B 6" buss bar

Part Number: 40279
 Electrode kit "SERVICEMAN'S"
Packaging: Durable plastic case

Includes
 This kit includes 16 different standard electrodes, and 4 - O.E.M. electrode assemblies and 20 of the most popular insulators in the industry.
 Contains the following parts:

<u>Standard electrodes</u>	<u>Insulators</u>
4 ea. 05040	4 ea. 11041
4 ea. 05050	4 ea. 15040
4 ea. 05060	4 ea. 15050
4 ea. 06050	4 ea. 15060
	4 ea. 16050

O.E.M. Electrodes
 4 ea. 20411 Beckett
 4 ea. 20418B 6" buss bar

Part Number: 40278
 Electrode kit "MASTER"
Packaging: Durable plastic roll-up pouch
Includes: This kit includes 20 different standard electrodes to provide a variety that will help any master mechanic to restore service due to electrode failure.
 Contains the following parts:

<u>Standard electrodes</u>	<u>Standard electrodes</u>
2 ea. 01041	2 ea. 04040 w/hex nut
2 ea. 01060	2 ea. 04040
2 ea. 02040	2 ea. 05040
2 ea. 02050	2 ea. 05050
2 ea. 02060	2 ea. 05060

Part Number: 40282
 Carlin electrode kit
Packaging: Durable plastic roll-up pouch
Includes
 This kit includes 22 of the most popular Carlin replacement electrodes in the field today. These O.E.M. replacements make a perfect match every time!
 Contains the following parts:

O.E.M. electrode(s)

2 ea. 20710	2 ea. 20725	2 ea. 20765
2 ea. 20720	2 ea. 20730	2 ea. 20770
2 ea. 20715	2 ea. 20760	6 ea. 20780

Part Number: 40283
 Beckett electrode roll-up kit

Packaging: Durable plastic roll-up pouch

Includes

This kit includes 18 of the most popular R. W. Beckett replacement electrodes. A perfect match every time!
 Contains the following parts:

O.E.M. electrode(s)

- | | | | |
|-------------|-------------|-------------|-------------|
| 4 ea. 20410 | 2 ea. 20413 | 2 ea. 20437 | 2 ea. 20415 |
| 2 ea. 20411 | 2 ea. 20414 | 2 ea. 20441 | 2 ea. 20420 |

Part Number: 40290
 Electrode repair kit - "Build an electrode"

Packaging: Durable plastic carrying case

Includes

This kit contains a variety of replacement insulators, rods and accessories to custom make your own electrode's for emergency and long term standard upgrades. A must for any, "NO HEAT", service call.

Qty. Contents

- 6 ea. 11041 Glazed insulator - 7/16" dia. x 4 1/4" long
- 6 ea. 15050 Glazed insulator - 9/16" dia. x 5" long
- 6 ea. 16050 Glazed insulator - 9/16" dia. x 5" long w/CB
- 3 ea. Package of assorted fasteners, nuts, and washers
- 2 ea. 40305 Electrode rod pack - 10-32 thread.
- 1 ea. 40300 Electrode rod pack - 6-32 thread.
- 1 ea. 40400 Terminal crimping tool / electrode rod cutter

Part Number: 40284
 Wayne electrode roll-up kit

Packaging: Durable plastic roll-up pouch

Includes

This kit includes 18 of the most popular Wayne burner replacement electrodes. A perfect match every time!
 Contains the following parts:

O.E.M. electrode(s)

- | | | | |
|-------------|-------------|-------------|-----------|
| 2 ea. 28020 | 2 ea. 28023 | 2 ea. 28026 | 2 ea. 280 |
| 4 ea. 28022 | 4 ea. 28024 | 2 ea. 28028 | |

Part Number: 51345C
 Beckett electrode kit CF 800/500

Packaging: Poly bag

Includes:

- 2 - Electrode assemblies
 - 1 - Instruction sheet
- For use on burner models CF 800 and CF 500 up to 8" air tube combinations.

Part Number: 40286K

Carlin electrode tune up kit

Packaging: Poly bag hang card

Includes:

- 2 - 20762 Electrode assemblies
 - 1 - Yellow electrode setting gauge
 - 1 - Red electrode setting gauge
 - 1 - Instruction sheet
 - 1 - KK100 coupler w/end caps
 - 1 - 12" L x 3/16" Dia. copper oil line
- For use on burner models 98 - 102, elite, 201 CRD & 301 CRD.

Part Number: 51346C

Beckett electrode kit CF 800/500 Over 8" AT

Packaging: Poly bag

Includes

- 2 - Electrode assemblies
 - 1 - Instruction sheet
- For use on burner models CF 800 and CF 500 over 8" air tube combinations.

Part Number: 51484U
 Beckett electrode kit AFII-85/150
Packaging: Poly bagged & tagged

Includes:
 2 - Electrode assemblies
 2 - Transformer wires
 1 - Multi-purpose setting gauge
 1 - Instruction sheet
 For use on burner models AFII-85 and AFII-150 with air tube combination models HLX - HB, HC, HD, and HE up to 9" air tube combinations.

Part Number: 51811U
 Beckett electrode kit model NX
Packaging: Poly bagged & tagged

Includes:
 2 - Electrode assemblies
 2 - Couplings
 2 - Rod extension - 4 7/8" L
 2 - Rod extension - 2 7/8" L
 1 - Instruction sheet
 For use on burner model NX.
 (Setting gauge sold separately, order P/N: 40439)

Part Number: 51670U
 Beckett electrode kit AFII
Packaging: Poly bagged & tagged

Includes:
 2 - Electrode assemblies
 2 - lead wires with assorted connectors
 1 - Extension hdwr., Instruction Sheet & gauge
 For use on burner models AFII 85 & 150 burners EA16711L for FBX burner head up to 9"

Part Number: 51859
 Beckett electrode kit model CF375
Packaging: Poly bagged & tagged

Includes:
 2 - Electrode assemblies
 2 - Support insulators
 1 - Instruction sheet
 For use on burner model CF375.

Part Number: 51771U
 Beckett solid state ignitor A,AF & AFG
Packaging: Boxed & tagged

Includes:
 1 each Igniter With Base Plate Used in models A, AF, AFG and NX Burners. 120VAC/60HZ/35VA/6kv RMS output voltage.

Part Number: 5780C
 Beckett electrode kit AFG, AF, AR,SF, SR
Packaging: Poly bagged & tagged

Includes:
 2 - Electrode assemblies
 2 - Connector studs
 2 - Extension rods
 2 - 10/32 Hex nuts
 1 - Instruction sheet
 For use on burner models AFG, AF, AR, SF, & SR burners up to 9" air tube combinations.
 (Setting gauge sold separately, order P/N: 40443)

Part Number: 51212C
 Beckett electrode kit for CF1400 / CF3500
Packaging: Poly bagged & tagged

Includes:
 2 - Electrode assemblies
 For use on Beckett burner models CF1400 & CF3500

Part Number: 5780K
Beckett electrode tune up kit AF, AR, SF, & SR

- Packaging:** Poly bag hang card
Includes:
2 - Electrode assemblies w/connectors
2 - Extension rods
2 - 10/32 Hex nuts
1 - Instruction sheet
1 - KK100 coupler w/end caps
1 - 12" L x 3/16" Dia. copper oil line
1 - 40443 Electrode setting gauge
For use on burner models AF, AR, SF, & SR burners up to 9" air tube combinations.

Part Number: 5782K
Beckett electrode tune up kit AF, AR, SF, & SR 9"+ AT

- Packaging:** Poly bag hang card
Includes:
2 - Electrode assemblies w/connectors
2 - Secondary support insulators
2 - Extension rods
2 - 10/32 Hex nuts
1 - Instruction sheet
1 - KK100 coupler w/end caps
1 - 12" L x 3/16" Dia. copper oil line
1 - 40443 Electrode setting gauge
For use on burner models AF, AR, SF, & SR burners over 9" air tube combinations.

Part Number: 5781C
Beckett electrode kit model A & S

- Packaging:** Heat sealed poly bag
Includes:
2 - Electrode assemblies
2 - Connector studs
2 - Spring connectors
2 - Extension rods
2 - 10/32 Hex nuts
1 - Instruction sheet
For use on burner models A & S burners up to 9" air tube combinations.

Part Number: 5783
Beckett electrode kit model A & S 9"+ AT

- Packaging:** Heat sealed poly bag
Includes:
2 - Electrode assemblies
2 - Support insulators
2 - Bullet connector studs
2 - Extension rods
2 - 10/32 Hex nuts
1 - Instruction sheet
For use on burner models A & S burners over 9" air tube combinations.

Part Number: 5782C
Beckett electrode tune up kit AFG, AF, AR, SF, & SR

- Packaging:** Poly bagged & tagged
Includes:
2 - Electrode assemblies
2 - Support insulators
2 - Connector studs
2 - Extension rods
2 - 10/32 Hex nuts
1 - Instruction sheet
For use on burner models AFG, AF, AR, SF, & SR burners over 9" air tube combinations.
(Setting gauge sold separately, order P/N: 40443)

Part Number: 578705
Beckett electrode set EA22406C

- Packaging:** Poly bagged & tagged
Includes:
2 - Electrode assemblies
1 - Instruction sheet
For use on a variety of private label burner models AF & SF. Reference #EA22406C

Part Number: 578707C
 Beckett electrode kit AFG, AF, SF, AF-90
Packaging: Heat sealed poly bag
Includes:
 2 - 20418 Electrode assemblies (EA28406C)
 For use on a variety of private name brand burner models. Used in models AFG, AF, SF, AF-90 series burners up to 9" air tubes.

Part Number: 578716
 Beckett electrode kit AFG & SF
Packaging: Poly bagged & tagged
Includes:
 2 - Electrode assemblies
 For use on a variety of private label burner models AFG & SF. Reference #EA23906K.

Part Number: 578708C
 Beckett electrode kit AFG & SF
Packaging: Poly bagged & tagged
Includes:
 2 - Electrode assemblies
 For use on burner models AFG & SF with 7 1/4" long air tubes. Reference #EA24106C

Part Number: 578723C
 Beckett electrode kit AF, SF & SM
Packaging: Heat sealed poly bag
Includes:
 2 - 20401 Electrode assemblies (EA15802B) used on a variety of private name brand burner models. Used in models AF, AF-44 series, SF, and SM burners. 4 1/2" air tube only.

Part Number: 578711C
 Beckett electrode kit AF-10/15
Packaging: Poly bagged & tagged
Includes:
 2 - Electrode assemblies
 For use on burner models AF-10 & AF-15. Reference #EA13302B.

Part Number: 5940
 Beckett electrode kit MB, & MD
Packaging: Poly bag & tagged
Includes:
 2 - Electrode assemblies
 2 - Female connector studs
 2 - Extension rods
 For use on burner models MB & MD burners up to 9" air tube combinations. use on burner models CF 800 and CF 500 up to 8" air tube combinations.

Part Number: 578712C
 Beckett electrode kit AFG & SF
Packaging: Poly bagged & tagged
Includes:
 2 - Electrode assemblies used on a variety of private name brand burner models for AFG & SF. Reference # EA21506C.

Electric Feed-throughs

Auburn electric feed-throughs are used in oil and gas filled transformers and switching equipment.

Additional applications include terminals and overloads in hermetic air conditioning and refrigeration compressors, explosion proof electric motors, generators, autoclaves, and centrifugal and submersible pumps.

They are compact and their one piece design assures positive electrical and leak-proof connection into the pressure vessel.

90 Degree Ceramic Boot with terminal
 1000° F Max. temperature rating for use with 7mm wire
 Use crimping tool 40407 or 40408

61900

Straight spark plug terminal
 For use with 7mm wire. Use crimping tool 40407 or 40408

61901

90 Degree spark plug terminal
 For use with 7mm wire. Use crimping tool 40407 or 40408

Part Number(s):

- P-380-L (3/4" HEX x 3/8" NPT TH'D. - 500 psi)
 - P-500-L (27/32" HEX x 1/2" NPT TH'D. - 500 psi)
 - P-750-L (1 1/16" HEX x 3/4" NPT TH'D. - 500 psi)
 - P-1000-L (1 3/8" HEX x 1" NPT TH'D. - 500 psi)
 - P-1140-L (1 3/4" HEX x 1 1/4" NPT TH'D. - 500 psi)
 - P-1122-L (2" HEX x 1 1/2" NPT TH'D. - 500 psi)
- Observation Ports - Lenz Brand

Packaging: Poly bagged & tagged

Includes: 1 - observation port from the above list.

Quality one piece construction. Cold rolled steel with electroless nickel plate. Bora Silica lens is heated and molded into shell body for superior sealing. Ports have Buna seals and are compatible with petroleum based fluids, gasoline, lube oil fuel and a variety of solvents.

Part Number(s):

- P-380 (3/4" hex with a 3/8"-18 thread - MOP 350 psi)
 - P-500 (7/8" hex with a 1/2"-14 thread - MOP 275 psi)
 - P-750 (1 1/8" hex with a 3/4"-14 thread - MOP 200 psi)
 - P-1000 (1 3/8" hex with a 1" - 11 1/2" thread - MOP 150 psi)
- Observation Ports - Auburn

Packaging: Poly bagged & tagged

Includes: 1 - observation port from the above list.

Unsurpassed quality! Our ports offer unitized cico-weld construction with no organic gasket. Our one piece design is compact and leakproof at high temperatures and pressures. Maximum operating temperature is 400 degrees Fahrenheit. Maximum operating pressure (MOP) range from 150 thru 350 psi as specified above.

Prodes - Stainless Steel & Brass

Made of quality brass and stainless steel all our probes have a standard length of 24" with a threaded end.

Our probes give you the reach you need and can be cut to size in the field if it's too long.

40003S	3/8"	3/8-16	STAINLESS

CA Series Industrial Igniters & Flame Rods

Crown Engineering Corporation, the original OEM manufacturer of electrodes, igniters, and flame rods for oil and gas burners, is proud to announce it's new line of industrial igniters and flame rods.

Never before has Crown's quality and workmanship been so evident, as in our NEW industrial line of igniters and flame rods. You can select from a wide variety of stocked items in this catalog or we can B.T.O. (build to order) against your submitted samples and/or drawings...your choice!

Our industrial igniters and flame rods match the original OEM critical specs from the seat of the gland nut to the tip of the center wire or from the end of the gland nut thread to the tip of the center wire, whichever is applicable. Our protruding insulator length or over-all length proves to be of no significance in the field application. All of our igniters are made of high quality heat resistant alloy (H.R.A.) center wires and grade L3 Steatite glazed insulators (except wherever noted). In high pressure applications center wires are cemented in place and Viton® O-rings are included inside the gland nut assemblies. We look forward to serving all your industrial application needs.

Flame Rod Note: Flame rods are for low voltage applications and are not to be used as spark igniters. They should not be used with transformers, the porcelain will fail.

Industrial Igniter Development Page

While we cannot fathom the idea that you could not find what you were looking for in our standard line of industrial igniters, we will definitely go the extra mile to develop what you need. Our XX-series of specialty igniters are developed daily to meet the needs of "jimmy it, DIY fixes, and imaginative designs," across the globe.

Just fill in the specs, quantity, and fax it over to get price & availability in a snap!

ENGINEERING CORPORATION

Special Electrode Development Work Sheet

PLEASE ANSWER ALL QUESTIONS & FAX TO: CROWN ENG. CORP. (F) 888-645-7278

1. What is the diameter of the Porcelain / Ceramic Insulator? (Check one box) 7/16" DIA 1/2" DIA 9/16" DIA OTHER _____ DIA
2. What is the length of the Porcelain / Ceramic Insulator? Enter decimal inches or fractional inches only: _____
3. What is the length of the wire from the face of the Porcelain / Ceramic Insulator? _____
4. What is the diameter of the wire or rod? (Check one box): 3/32" DIA 1/8" DIA 3/16" DIA 1/4" DIA OTHER _____ DIA.
5. Is this item going to be used as a (Check one box): Igniter Flame Rod OTHER _____
6. Do you require an adjustable gland nut assembly? (Check one box): YES NO
 If your answer is YES, Please select from the below options:
7. Quantity needed: _____

Based on the information that you have supplied, we are pleased to quote as follows:

YOUR COST: _____

LEAD-TIME: _____

USE P/N: _____

Part Number:
 40300 (1/8" rod dia. X 6-32 Thread)
 40305 (3/16" rod dia. X 10-32 Thread)
 Electrode field replacement rod paks

Packaging: Poly bagged & tagged

Includes: 4 each of one of the above items
 Our electrode rod paks are designed to fit Crown insulators up to 6" in length.
 40300 fits the following ceramic diameters, 7/16", 1/2", and 9/16" with 1/8" key way bore.
 40305 fits the following ceramic diameters, 7/16", 1/2", and 9/16" with 3/16" key way bore.

Section 4 - Electrical

Part Number: 13666
 Honeywell Flame detector - 90° Bracket

Packaging: Boxed

Includes:
 1 - flame detector with 30" lead.
 1 - 90 degree bracket.
 1 - Instruction sheet.
 Used in Wayne burner models
 EH(12"+tubes), HS(12"+ tubes), and FH.

UL file: MP268
UL style: C554A

NOTE: For replacement eyes only see page 69

Part Number: 13667
 Honeywell Flame detector - Str8 bracket

Packaging: Boxed

Includes:
 1 - flame detector with 48" lead.
 1 - Bracket
 1 - Instruction sheet.
 Used in White Rodgers equipment. Replaces Honeywell #C554A-1794. UL recognized and C.S.A. certified.

UL file: MP268
UL style: C554A

Part Number: 13668 (Old P/N: TMK60)
 Honeywell Cad Cell Kit - 6 brackets

Packaging: Boxed

Includes:
 1 - flame detector with 60" lead.
 6 - Brackets.
 1 - Instruction sheet.
 A true universal kit that meets the needs of many burner model applications.
 Replaces Honeywell #C554A-1463.

UL file: MP268
UL style: C554A

Part Number: 14289
 Honeywell Flame detector - 17° bracket

Packaging: Boxed

Includes:
 1 - flame detector with 15" lead.
 1 - 17 degree Bracket.
 1 - Instruction sheet.
 Used in Wayne burner models MEG1, EHS, EG1(3", 6", & 9" tubes), MSR, EH(6" & 9" tubes), EH (Weil-McLain specs), HS, HS(6" & 9" tubes), HS(Weil McLain specs).
 Also used in Bock water heater specs for MSR, EH, & HS.

UL file: MP268
UL style: C554A

BUSS BARS

We stock three types of buss bar connectors available in standard lengths of 6", 8", 10", and 12". Our type "E" and "S" rounded buss bars feature annealed 1/8" diameter 303 Stainless Steel with 6-32 roll threads. Our type "F" flat buss bars feature 3/8" wide X .040 thick 260 brass alloy.

P/N	Length	Type
40309	6" Long	"E" round hook buss bar
40311	8" Long	"E" round hook buss bar
40313	10" Long	"E" round hook buss bar
40315	12" Long	"E" round hook buss bar

P/N	Length	Type
40316	6" Long	"F" flat buss bar
40318	8" Long	"F" flat buss bar
40319	10" Long	"F" flat buss bar
40320	12" Long	"F" flat buss bar

P/N	Length	Type
40322	6" Long	"S" round straight buss bar
40324	8" Long	"S" round straight buss bar
40325	10" Long	"S" round straight buss bar
40326	12" Long	"S" round straight buss bar

Part Number: 41800
 Ignition terminal kit - "Mini-Kit"
Packaging: Sturdy hinged plastic box
Includes:
 20 - 50000 Cage
 12 - 50100 Spring
 20 - 50200 Ring
 10 - 50400 Angle Cage
 12 - 50600 Stud ferrule

Part Number: 41810
 Ignition terminal kit - "Deluxe Kit"
Packaging: Sturdy hinged plastic box
Includes:
 12 - 50000 Cage
 12 - 50100 Spring
 12 - 50200 Ring
 12 - 50400 Angle Cage
 12 - 50600 Stud ferrule
 12 - 50760 6-32 Hex base stud
 12 - 50700 10-32 Hex base stud
 12 - 50860 6-32 Hollow thd. stud
 24 - 50800 10-32 Hollow thd. stud
 12 - 51550 Cage/Cage
 12 - 51630 Cage/Thrd. stud
 12 - 45580 Transformer clip
 12 - 52210 Cage/Buss bar clip
 12 - 52260 10-32 Hex stud
 1 - 40400 Crimping/Rod cutter
 12 - 52340 10-32 Spring
 1 - 40436 Combo ratchet set 1/4" x 5/16"

Part Number: 41805
 Ignition terminal kit - "Transformer kit"
Packaging: Sturdy hinged plastic box
Includes:
 6 - 45580 Transformer clip
 6 - 50800 10-32 Hollow thrd. stud
 6 - 51550 Cage/Cage
 6 - 52210 Cage/Buss bar clip
 6 - 52230 Hex/Buss bar clip
 6 - 52260 10-32 Hex base stud
 6 - 52290 Spring adapter
 6 - 52300 Spring adapter
 4 - 52315 Binding post
 4 - 52340 10-32 Spring contact
 6 - 52350 10-32 Contact post

Part Number: 41813
 Ignition terminal kit - "Build-A-Lead Jr. Kit"

Packaging: Sturdy hinged plastic box

Includes:

- 1 - 40407 Automotive crimp tool
- 10 ft - Hi-temp red silicone cable
- 10 - 50739 90 degree red silicone boots
- 10 - 50740 Straight red silicone boots
- 20 - 61900 Straight automotive terminal connectors
- 20 - 61901 90 degree automotive terminal connectors

Let's get creative! Our "Build-A-Lead Jr. kit has everything you need to create "Johnny on the spot" transformer leads. Create leads at will with our professional crimping tool for beautiful connections on demand!

Part Number: 41814
 Ignition terminal kit - "Build-A-Lead Kit PRO"

Packaging: Sturdy hinged plastic box

Includes:

- 1 - 40408 Ratcheting PRO crimping tool w/attachments
- 10 ft - GTO-15 cable
- 20 ft - Hi-temp red silicone cable
- 10 - 50100 crimp on spring terminals
- 10 - 50500 crimp on angle spring terminals
- 15 - 50739 90 degree red silicone boots
- 15 - 50740 Straight red silicone boots
- 25 - 61900 Straight automotive terminal connectors
- 25 - 61901 90 degree automotive terminal connectors

For the serious PRO! Our "Build-A-Lead PRO Kit," has everything you need to create "Johnny on the spot" transformer leads, high temperature connections and everyday transformer connections. Create leads at will with our professional ratcheting crimping tool for beautiful connections with minimal effort! The tool includes 3 interchangeable jaws for professional automotive crimps, insulated wireless terminal crimps, and uninsulated wireless terminal crimps too!

**Professional Kits.....
 That get the job done!**

Part Number: 41815
 Ignition terminal kit - "Terminal & tool kit"

Packaging: Sturdy hinged plastic box

Includes:

- 24 - 50000 Cage
- 24 - 50100 Spring
- 24 - 50200 Ring
- 24 - 50300 Split ring
- 24 - 50400 Angle cage
- 24 - 50450 Right angle cage
- 24 - 51000 Ferrule/Ferrule
- 100-50900 Eyelets
- 1 - Crimping tool

Cad Cell Eyes

Part Number: 45610
 Flame detector cad cell eyes - C-10

Packaging: Carded - 5 per card

Includes:

Our flame detectors are hand crafted and tested twice.

Once before assembly, and after. Look for them in our attractive strip packaging. Ideal POP area's.

Please order in increments of 5.

A direct replacement in the Honeywell C554A, Honeywell replacement cell part numbers 130367, 120320 and 124607.

Specifications

- Maximum Voltage: 30 VAC
- Maximum Resistance: Min. 300 OHMS
- During Firing: Max. 1,600 OHMS
- Max. Cell Surface Temp: 180° F
- Method of Sensing: Cadmium Sulfide

Terminal Packaging Note

Please note that most of the terminal connectors listed on pages 70 through 71 are packaged in 10 and 50 packs.
 To order a 10 pack simply add the suffix -10 after the 5 digit part number.
 For a 50 pack add a -50.

Part Number: TCK - 1

Transformer contact kit
Packaging: Poly bag & tagged
Includes:
 2 - 45580 Contact buss bar clips
 2 - 60010 #10 Split lock washer
 2 - 60999 #10 Flat washer
 2 - 60022 10-32 Hex nut

Can be used in a variety of applications and equipment.

 Terminal Kit - "Big Box"
Packaging: Sturdy Hinged Box
Includes:
 1 - Big Box containing all of the terminals listed on this page
 Each compartment contains 50 each of the above terminal connectors that are the most popular in our industry.
 1 - Each 40401 8mm/terminal crimping tool
 3 - Each 6" long 1/8" fuel resistant shrink tube
 3 - Each 6" long 1/4" fuel resistant shrink tube
 And when you empty out a compartment just re-order using the above part numbers and add the suffix -50 and you are re-stocked in a snap! The heavy duty high impact case protects and organizes your parts for ease of use.

Hi-Temp Wire Leads

Part Number: 70043-02

Cable leads for Weil-McLain

Packaging: Poly bagged & tagged

Includes:

1 - Set of wire leads

Original OEM replacement leads for Weil-McLain models QB180 & 300. Weil-McLain P/N: 644-600-043. This lead features a .125 round female rod connector on one end and a 1/4" female spade connector on the other. Both crimped connections are protected by a 1" long oil resistant shrink tube.

Specifications:

- 11 3/4" Over all length
- 20KVDC
- 150° C / 302° F

Part Number: 70071

Cable leads for Honeywell

Packaging: Poly bagged & tagged

Includes:

1 - 7mm Wire lead per bag

Crown generic replacement for Honeywell #:392125-2

These hi-temp rated leads offer a 90° automotive type connector on one end and a straight automotive type connector on the other end.

Specifications:

- 36" Over all length - 18 AWG - 25KVDC / 10KV / 60 HZ - 250° C / 482° F - UL FILE: E-96824 - UL STYLE: 3257

Part Number: 70070

Cable leads for Honeywell

Packaging: Poly bagged & tagged

Includes:

1 - 7mm Wire lead per bag

Crown generic replacement for Honeywell #:394800-30.

These hi-temp rated leads offer a 90° automotive type connector on one end and a 1/4" female insulated tab on the other end.

Specifications:

- 30" Over all length - 18 AWG - 25KVDC / 10KV / 60 HZ - 250° C / 482° F - UL FILE: E-96824 - UL STYLE: 3257

Part Number: 70072

Cable leads for Honeywell

Packaging: Poly bagged & tagged

Includes:

1 - 7mm Wire lead per bag

Crown generic replacement for Westwood #:E64-5

These hi-temp rated leads offer a 90° automotive type connector on one end and a straight automotive type connector on the other end.

Specifications:

- 33 1/2" Over all length - 18 AWG - 25KVDC / 10KV / 60 HZ - 250° C / 482° F - UL FILE: E-96824 - UL STYLE: 3257

Twisted Rope - High Temp.

Our ceramic fiber rope is a twisted three-ply rope made to meet tough industrial standards, **2300 degrees fahrenheit (1260 degrees centigrade)**. Typical uses include gasketing, packing and sealing applications. Our rope exhibits excellent chemical stability, resisting attack from most corrosive agents. Exceptions are Hydrofluoric and Phosphoric acids and concentrated alkalis. They also resist Oxidation and Reduction. If wet by water or steam, thermal and physical properties are completely restored upon drying. No water hydration is present.

Braided Rope - High Temp.

Our ceramic fiber braided rope is a tightly knitted braid that keeps it's form under the most extreme applications. It won't unravel or flatten and is easy to cut.

Constant operating temperature of 2300 degrees fahrenheit (1260 degrees centigrade). Typical uses include gasketing, packing and sealing applications. Our rope exhibits excellent chemical stability, resisting attack from most corrosive agents. Exceptions are Hydrofluoric and Phosphoric acids and concentrated alkalis. They also resist Oxidation and Reduction.

Fiberglass tape

Packaging: Shrink wrapped - 100' roll.

Includes:
 1 - 100' roll of one of the above selected sizes.
 Flex-Tape has a **temperature rating of 1000° F (538° C)**.
 Flex-Tape is a knitted fiberglass tape manufactured from textured fiberglass yarn. It contains no compounds, cement, or wire. The knitting process includes a non-fraying edge.

Applications include:
 Used in ovens, furnaces and boilers as a door seal, as pipe wrapping in such applications as steam tracer lines, as tadpole tape gasket covering material, and in many other gasket and insulation applications.

Part Number (s):
 48001 - 1' x 50' roll
 48002 - 2' x 50' roll
 48004 - 3' x 50' roll
 48006 - 4' x 50' roll

Fiberfrax® 440J gasket paper

Packaging: Plain corrugated carton

Includes:
 1 - roll of 1/8" thick 440J gasket paper of selected size.
 Fiberfrax® 440J paper is a commercial grade, paper made from a combination of ceramic fiber, inert fillers and fiberglass to produce an exceptionally strong sheet for use up to 704 degrees Centigrade/1300 degrees Fahrenheit. Ideal for gasketing applications. Its easy to handle and can be cut, wrapped and rolled.

 48022 (2" T X 48" W X 12 1/2' L)
 48023 (1" T X 24" W X 25' L Zirconia Grade)
 48024 (1" T X 48" W X 25' L Zirconia Grade)

Ceramic fiber blanket

Packaging: Carton

Includes:
 1 - roll of one of the above selected sizes.
 Our TaoFibre® Ceramic Fiber Blankets are spun ceramic fiber blanket, which are lightweight and thermally efficient, resulting in a material that possesses the advantages of low heat storage and complete resistance to thermal shock. Used in a variety of heat processing applications, the ceramic fiber blanket is produced from high strength spun ceramic fibers and is needed to provide exceptional handling strength. The ceramic fiber blanket is completely inorganic and is available in a variety of thicknesses, and widths. Our blankets are comparable to Durablanket® S & HP-S and our Zirconia grade is comparable to Durablanket® 2600. All of our blankets have an average tensile strength of 8 pcf. density (11.60 psi).
 Part # 48015 to 48022 **max. temp.rating 2300° F (1260° C)**.
 Part # 48023 to 48024 **max. temp.rating 2600° F (1426° C)**.
NOTE: UPS up-charge applies due to carton dimensions.

Applications include:

- Furnace, klin, and boiler linings
- Casting mold wrappings
- Flexible high-temperature pipe insulation
- Furnace door linings and seals
- Furnace repairs
- Expansion joint seals
- Wrapping insulation

Part Number(s):

- 48101 (12 per case 1/2" Tk. X 2' X 3' LD) *
- 48102 (6 per case 1" Tk. X 2' X 3' LD)
- 48103 (4 per case 1 1/2" Tk. X 2' X 3' LD)
- 48104 (3 per case 2" Tk. X 2' X 3' LD)
- 48105 (4 per case 1" Tk. X 2' X 4' LD)
- 48106 (6 per case 1/2" Tk X 3 1/2' X 4' LD)
- 48107 (8 per case 1/2" Tk X 2' X 4' LD)
- 48108 (2 per case 2" Tk X 2' X 4' LD)
- 48125 (24 per case 1/4" Tk. X 2' X 3' HD)
- 48131 (12 per case 1/2" Tk X 2' X 3' HD)

Refractory boards

Packaging: Corrugated carton

Includes:

1 case of LD or HD fiberboards from the above list.
 Our TaoFibre® high temperature ceramic fiber boards feature high temperature stability, low thermal conductivity, even density, and excellent resistance against thermal shock and chemical attack. TaoFibre® ceramic fiber board also resists oxidation and reduction. If they are wet by water, steam, or oil, physical and thermal properties are fully restored upon drying. Ceramic Fiber board is used for a variety of high temperature applications, including refractory linings, backup insulation, baffles and muffles, heat shields, combustion chambers, flue insulation, and fire protection. These ceramic fiber boards are low density for easy cutting and have a continuous temperature rating of 2300° F / 1260° C.

*NOTE: This item must ship via UPS Freight service to prevent shipping damage, or freight disclaimer signature required.

Original replacement gaskets for Beckett, Carlin, & Wayne burners

The below gaskets are the original OEM gaskets for the below specified burners.

Guaranteed to work in the application! For gasket specifications please contact the OEM directly.

Part Number: 100428

Wayne flange gasket HS HSR HSG

Dimensions: 7 1/2" OD X 4" ID

Used in models: HS, HSR, & HSG

Part Number: 12484

Wayne flange gasket EH EASR EHA

Dimensions: 7 3/8" OD X 4 5/16" ID

Used in models: EH, EASR, & EHA

Part Number: 3616

Beckett flange gasket - Universal

Dimensions: 8 1/2" OD X 3 15/16" ID

Used in models: Universal

Part Number: 3811

Beckett flange gasket #68 W-M Boilers

Dimensions: 6 1/4" L X 6 1/4" W

Used in models: Used in #68 Weil-McLain boilers.

Part Number: 5432

Beckett flange kit AF,AFG,SR,SF, & SMG

Packaging: Poly bagged & tagged

Includes: 1 ea. Flange & 1 ea. Gasket (3616)

Fits models AF,AFG,SR,SF, & SMG.

Part Number: 75016

Carlin flange gasket #40287

Dimensions: 8" OD X 3 1/8" ID

Used in models: 99-101 CRD, G3 & EZ1

Part Number: 70203 - 11 oz. caulking tube

Ceramic putty - Thermeez®

Packaging: Bulk

Includes:

1 - 11 oz. tube of Thermeez ceramic putty
 Thermeez is made of a high purity, asbestos free, aluminum oxide based ceramic with a melting point in excess of 3200° F. **It has a continuous service temperature of 3000° F.** Use for instant repairs to brick, mortar, burner blocks, insulation, furnace holders, thermocouples, etc...just apply and let dry!. Resistant to molten metals, most chemicals, oxidizing, and reducing atmospheres.
 Cures in 24 hours at room temperature. Drying process can be accelerated by using a heat gun for emergency repairs. This product has a 8 - 12 month shelf life.

Properties

- Base.....AL203
- Loss factor.....0.017
- Continuous service.....3000°F
- Melting point.....3200°F
- Density.....40 - 50#/ft.³
- Specific heat.....0.25 BTU/#°F
- Dielectric constant @ 10³ CPS.....1.61
- Dielectric strength.....100 volts/mil.
- Freezing point.....32°F
- Thermal conductivity*.....0.65
- *BTU/Hr.°F ft. @ 500°F

Burner Gaskets - Assorted

We make a wide variety of generic gaskets for a variety of burners. These gaskets are made of a 1/8" thick white non-asbestos material and have a continuous operating temperature of 2300 degrees fahrenheit.

Part Number: 75000
 Miller large pouch gasket
Dimensions: 16"L X 10 1/2"W
Used in models: CMF, MOC, & MGC
 Miller #: 301205000

Part Number: 75007
 Universal gasket - No bolt holes
Dimensions: 8"OD X 4"ID
Used in models: Universal

Part Number: 75001
 Miller small pouch gasket
Dimensions: 13 5/8"L X 10"W
Used in models: MMG82
 Miller #: 301181000

Part Number: 75008
 Utility gasket roll
Dimensions: 25 Ft. X 1" Wide
Used in models: Universal

Part Number: 75002
 Miller burner flange gasket
Dimensions: 6 1/2"OD X 4 1/4"ID
Used in models: CMF, & MOC
 Miller #: 300001000

Part Number: 75009
 Carlin flange gasket 1150
Dimensions: 12"OD X 10"ID
Used in models: 1150

Part Number: 75003
 Riello air tube gasket
Dimensions: 5 1/4"L X 5 1/4"W
Used in models: Universal

Part Number: 75010
 Carlin flange gasket 1050
Dimensions: 11"OD X 8 3/4"ID
Used in models: 1050

Part Number: 75004
 Thermo Pride cover gasket
Dimensions: 4"OD X 3/8"ID
Used in models: Universal

Part Number: 75011
 Carlin flange gasket 801 PF
Dimensions: 11"OD X 5 1/4"ID
Used in models: 801 Pressure fired

Part Number: 75005
 G. E. Door Gasket
Dimensions: 10"OD X 8"ID
Used in models: Universal

Part Number: 75012
 Carlin flange gasket 201-701 CRD
Dimensions: 10"OD X 4 1/8"ID
Used in models: 201, 301, 501, 601 & 701 Pressure fired CRD

Part Number: 75006
 Cover gasket - Heil / Bradford / Olsen
Dimensions: 3"OD X 2"ID
Used in models: Universal

Part Number: 75013
 Carlin flange gasket 801 STD
Dimensions: 8 1/2"OD X 5 1/4"ID
Used in models: 801 STD

Part Number: 75014
 Carlin flange gasket 40246
Dimensions: 8 1/2"OD X 4 1/8"ID
Used in models: 501, 601 & 701 STD

Part Number:
 FC30-1005 (11oz. Caulk tube)
 FC30-1040 (1 gal. Pail)
 DO-ALL+ Furnace cement
Packaging: Bulk

Includes:
 1 - each of the above part numbers
 Cures in 24 hours. Rated at 3000 degrees F. Will not shrink, pull away, crack, sag, run out of joint or lose sealing properties. Not harmed by freezing and thawing
 Used in cementing & resetting furnaces, boilers, stoves, chimney collars, sealing flue pipes, cementing & bedding of fire brick, boards and combustion chambers.

Part Number: 75015
 Carlin flange gasket 40287
Dimensions: 8 1/4"OD X 4 1/8"ID
Used in models: 201 & 301 STD

Part Number: 75017
 Miller flange gasket
Dimensions: 12 13/16"L X 4 9/16"W
Used in models: MSH / Miller #: 689505

- Part Number(s):**
- FR1-10 (1" DIA. X 10' Long)
 - FR1-25 (1" DIA. X 25' Long)
 - FR1-160 (1" DIA. X 160 Long)
 - FR112-100 (1 1/2" DIA. X 100' Long)
 - FR114-100 (1 1/4" DIA. X 100' Long)
 - FR12-10 (1/2" DIA. X 10' Long)
 - FR12-25 (1/2" DIA. X 25' Long)
 - FR12-550 (1/2" DIA. X 550' Long)
 - FR14-10 (1/4" DIA. X 10' Long)
 - FR14-25 (1/4" DIA. X 25' Long)

 - FR38-10 (3/8" DIA. X 10' Long)
 - FR38-25 (3/8" DIA. X 25' Long)
 - FR38-1000 (3/8" DIA. X 1000' Long)
 - FR58-10 (5/8" DIA. X 10' Long)
 - FR58-25 (5/8" DIA. X 25' Long)
 - FR58-350 (5/8" DIA. X 350' Long)

Part Number: 75018
 Miller flue gasket
Dimensions: 7 1/8"OD X 5 1/8"ID
Used in models: CMF, MOC & MGC
 Miller #: 301195000

Part Number: 75019
 Miller gasket kit
Includes:
 1 - 75000 (Miller # 301205000)
 1 - 75001 (Miller # 301181000)
 1 - 75002 (Miller # 300001000)
 1 - 75018 (Miller # 301195000)
Used in models: CMF, MOC, & MGC

Part Number: 75020
 Carlin gasket kit
Includes:
 5 - 75016 Carlin #40287
 1 - 75009 (Model 1150)
 1 - 75010 (Model 1050)
 1 - 75011 (Model 801 PF)
 1 - 75012 (Model 301-701 PF)
 1 - 75013 (Model 801 STD)
 1 - 75014 (Model 501-701)
 1 - 75015 (Model 201 & 301)
Used in models: 99-101 CRD, EZ1, 1150, 1050, 801 PF, 301,501, 601, & 701 PF, 801 STD, 501, 601, & 701 STD, 201 & 301 STD.

Knit braided fiberglass rope
Packaging: Boxed
Includes:
 1 - each of the above parts listed
 Our knit-braided fiberglass rope is manufactured to give superior qualities to high-temperature rope without the hazards associated with outdated materials. Flex-Rope resists temperatures up to 1000° F (538° C) Because of the special knit-braided process, it is available in a variety and densities.

Features and Benefits:
 Flex-Rope is extremely strong, resilient, and flexible. The special knit-braided process enables Flex-Rope to spring back to its original shape after compression, making it an excellent choice for gasketing that acts as a heat break or door seal. Used as gasketing for industrial ovens and furnaces, boilers and wood burning stoves. Makes an excellent core for tadpole tape gasketing.

Section 5 - Refractories & Gaskets

TROUBLE SHOOTING GUIDELINES

1. Work safely:

Always bring a fire extinguisher with you to the heater location, and always check the combustion chamber for raw fuel!. Do not fire a burner with a loaded chamber. Clean it up first. Better to be safe than sorry.

2. Talk to the customer:

Find out as much as you possibly can about the operating condition of the equipment prior to the service call. Ask if the furnace has been recently serviced, when was the last time it was cleaned, when was the last oil delivery, etc.

These types of questions can be valuable clues that may help determine why the equipment failed to operate.

3. Set the room thermostat:

Set for "HEAT," and raise the set point to its maximum setting.

4. Stick the tank:

This may seem like a waste of time (especially if the customer claims that they "just got a delivery the other day."), but it is a good habit to get into. I have wasted many hours over the years trying to get fuel units to pick up oil from empty tanks that were, "filled yesterday."

5. Now you are ready to begin working on the furnace itself:

Turn off the power switch and check the combustion chamber if you have not already done so. Clean up any raw fuel. The presence of raw fuel would be a good indication that there is oil up to the nozzle and that the problem lies somewhere in the ignition system. If the chamber is dry, feel the supply plenum (on forced air systems) or the water pipes (on boilers). In either case, they will be cold if the system has been down for any length of time. If they are hot to the touch, check to see if the equipment has shut down due to limit opening.

Likely problem areas would be an inoperative blower motor, dirty filters, or perhaps a bad circulator.

6. At this point you have been on the job site for about five minutes and may have already located the problem area:

If not, push the reset button on the primary control or stack switch. Make sure you have your fire extinguisher handy (just in case) and develop the habit of standing clear of the draft regulator and inspection port.

One of three things will happen. The burner motor will start and the burner will fire, the burner motor will start and the burner will not fire, or nothing at all happens.

7. If there is no response when pushing the reset, there is some sort of electrical problem with the equipment:

Use a voltmeter and confirm that there is voltage (usually 120 volts) to the primary control or stack switch. Disconnect the wires from the "T - T" terminals and jumper T to T on the control.

One a primary control, disconnect one of the yellow wires from the cad cell eye. Ambient light, a shorted eye, or a short in the wires from the cad cell will keep the burner from firing.

On stack controls, "step" the contacts by gently pulling and releasing the drive shaft. Try carefully jumping out the cold contacts.

Push the reset button on the burner motor, it may have tripped. At some point either the burner will fire or you will find the problem.

8. If the burner starts, but does not fire, turn it off after 10 seconds of operation:

Allowing the burner to run until the safety trips, may load the chamber with excess oil.

Disconnect the jet line (the line that connects the fuel unit to the nozzle line) from the nozzle line and direct it into a clear container.

Take enough oil (several ounces) so you can observe the sample for water or other contamination.

Install an oil pressure gauge in the nozzle line and check the pressure. On most systems the pressure should be set at 100 psi.

9. No oil at the jet line indicates some sort of delivery problem:

Check the coupling and confirm that the fuel unit drive shaft is turning.

Check vacuum. Very high vacuum indicates a restriction (or possibly a very long distance to the tank). No vacuum may indicate an air leak if the tank is below the burner.

Remove the side cover from the pump. Excessive dirt will require that the pump screen is cleaned and the pump may have to be replaced.

10. Good oil delivery at 100 psi and a clean oil sample indicates that the problem is in the oil burner itself:

Check the nozzle, the transformer, and the electrodes. The problem is somewhere in this area.

Conclusion:

These steps will allow you to work on any oil burner system with confidence. When working on any furnace, boiler, or mechanical system always look for logical procedures to follow that will allow you to quickly eliminate the unlikely areas and get right to the problem.

Reproduced by special permission of: **Oilheating Magazine.**

Part Number: KK100
 Burner coupling - KK100 kit
Packaging: Carded w/hanger knockout
Includes:
 Coupler assembled with 1/2" motor shaft end, and a 5/16" fuel unit shaft cap on the other. A 7/16" fuel unit shaft end cap is also enclosed. Over-all 5" assembled coupler length.

Part Number: KK400
 Burner coupling - Ultra KK400
Packaging: Flambeau utility box
Includes:
 The Ultra Coupling Kit provides everything the service technician needs for instant, on-the-job burner coupling repair and replacement. Packaged in a sturdy tool box. Each kit contains:
 10 - 12" length coupler shaft tubing
 24 - 1/2" end caps - grey
 16 - 5/16" end caps - green
 8 - 7/16" end caps - orange
 2 - 5/8" end caps - blue
 2 - 3/8" end caps - yellow
 1 - Torrington adapter
 1 - Handi-Kutter tool
 1 - 10 pk. repl. blades for Kutter
 1 - Instruction sheet

Part Number: KK100B-06
 Burner couplings - KK100 - Bulk 6/pk.
Packaging: Poly bagged & tagged
Includes:
 6 - KK100 Couplers assembled with 1/2" motor shaft end cap, and a 5/16" fuel unit end cap on the other. Also includes 6 - 7/16" end caps. This kit will meet most coupler replacement needs. Over-all 5" assembled coupler length.

Part Number: KK112
 Burner coupling - KK112 kit 12/pk
Packaging: Boxed in attractive carton
Includes:
 Everything needed to replace almost any defective domestic burner coupler.
 12 ea. 6" x 1" OD assembled couplers with 1/2" and 5/16" end caps. (Over-all 6" coupler length)
 4 ea. 1/2" motor end caps
 8 ea. 7/16" pump end caps
 3 ea. 5/16" pump end caps

OEM Ready Fit Couplers

- Ready to use on the most popular burners
- No cutting or fitting necessary
- Strong and lightweight
- 12 assembled couplers per box
- Unaffected by humidity
- Unaffected by oil and most chemicals
- Made in the U.S.A.
- Reliable

Our Pioneer brand OEM couplers are cut to the exact size for the below listed OEM models. A great way to save time on tune-ups and quick repairs.

Part Number	OEM Name	OEM Model
KK500B	Beckett	2454
KK500C	Carlin	201 - 301 CRD
KK500CA	Carlin	99RJE, 1020J, CRD 98-102
KK500CA-1	Carlin	1020 Mini pump
KK500W	Wayne	13279
KK500WA	Wayne	100386
KK500WM	Weil-McLain	QB180 & QB300

NOTE: Custom lengths are available to quote

Part Number: KK120
 Burner coupling - KK120 kit
Packaging: Carded w/hanger knockout
Includes:
 Coupler assembled with 1/2" motor shaft end cap on one side, and a 1/2" fuel unit shaft on the other. 5" over-all coupler length. Other end cap sizes include 5/8", 7/16", 3/8", and 5/16".

Burner Couplings - Bulk

Our coupler tubing is made of the same ridged urethane tubing used in our popular KK100 coupler kits. Great for making your own custom lengths.

Part Number	Tube OD	Tube Length
1T06	1"	6"
1T12	1"	12"
1T15	1"	15"
1T36	1"	36"

Burner Coupling End Caps

Bulk Pioneer Coupling End Caps

Our super strong plastic end caps are tough. Built to take high torque, shock starts, and stops.

Part Number	Shaft Size	Color Code
5/16	5/16	Green
3/8	3/8	Yellow
7/16	7/16	Orange
1/2	1/2	Gray
5/8	5/8	Blue

Part Number: HK
 Handi-Kutter - Pioneer coupling cutter
Packaging: Boxed in attractive carton
Includes:
 The Pioneer Handi-Kutter comes fully assembled and ready to serve all your coupler cutting needs.

Part Number: 1T06A
 Burner coupling kit - replaces WW#: S85-510
Packaging: Poly bagged & tagged
Includes:
 This coupler packaging style rivals WW kit #:99A or S85-510
 1 - 6" koupling shaft
 2 - 1/2" end caps
 2 - 7/16" end caps
 1 - 5/16" end caps

Part Number: 1T06B
 Burner coupling kit - replaces WW#: S85-520
Packaging: Poly bagged & tagged
Includes:
 This coupler packaging style rivals WW kit #:101 or S85-520
 1 - 6" koupling shaft
 2 - 1/2" end caps
 1 - 7/16" end caps
 2 - 5/16" end caps

Part Number: HKB-10
 Handi-Kutter replacement blades
Packaging: Plastic container
Includes:
 10 - stainless steel replacement blades. These blades are razor sharp, so please use caution when handling them. Blades are easy to install. Using a #2 flat screw driver remove screws holding existing blade, remove old blade, position new blade with sharp edge facing the cutting area, and secure in place with screws previously removed.

Part Number: TA
 Splined Hub-Adapters
Packaging: Bulk
Includes:
 Four designed splines within the Hub provide for sure gripping action for quick starts. Specifically designed for use with Torrington Blowers. Dimension are: 1" Hub Length, 1 1/8" Hub ID, 1 1/4" Hub OD, 11/16" L X 1/2" OD male connector 1 11/16" Over-all length

Part Number: KK100HK
 Burner coupling & Handi-Kutter kit
Packaging: Poly bagged & tagged
Includes:
 Coupler assembled with 1/2" motor shaft end, and a 5/16" fuel unit shaft cap on the other. A 7/16" fuel unit shaft end cap is also enclosed. Over-all 5" assembled coupler length. Our Handi-Kutter coupling cutter is also included.

Spring / Coiled Circulator Couplers

Part Number: 10010	
<p>Description: Spring coupler - 10010 Bore size: 1/2 X 1/2 OAL: 1 5/16" HP Range: 1/12 to 1/3 HP Rotation: CCW Fits B & G: 118705, 189110, 118723, 118705, & 189110. Fits Armstrong: 806026, 806168 & 806026.</p>	

Part Number: 10023	
<p>Description: Spring Coupling - 10023 Bore size(s): 1/2 X 1/2 or 1/2 X 5/8 OAL: 1 7/8" HP Range: 1/2 to 3/4 HP Rotation: CW Fits B & G: 118473, 118708 & 188709. Fits Armstrong: 807436 & 806137</p>	

Part Number: 10034	
<p>Description: Spring Coupling - 10034 Bore size: 5/8 X 5/8 OAL: 2 1/4" HP Range: 1 HP Rotation: CW Fits B & G: 118476 & P77271. Fits Armstrong: 812734 & 816665.</p>	

Part Number: 10045	
<p>Description: Spring Coupling - 10045 Bore Size(s): 1/2 X 1/2 or 1/2 X 5/8 or 5/8 X 5/8 OAL: 2 5/16" HP Range: 1/4 to 1 HP Rotation: CW Fits Taco: 121, 122, 131, 132, 133, & 138. Fits Woods: 3J & 4J</p>	

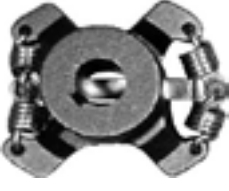

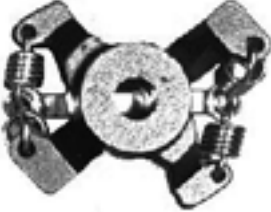

Part Number: 70010	
<p>Description: Spring Coupling TACO Bore Size: 1/2 X 3/8 OAL: 1 7/8" HP Range: 1/12 to 1/3 HP Rotation: CW Replaces: 110-009RP</p>	

NOTE: Rotation listed is determined by viewing the motor with the shaft pointing away. Always check rotation prior to installing. If looking at pump shaft end reverse rotation.

Section 6 - Burner & Pump Couplers

B & G / Armstrong Circulator Couplers

 41100	 41101	 41102
 41288	 41289	 *41299
<p>*Please note: We have replaced our old “zink” style coupling with our 41300 “cast iron” coupling and selling it under the old zink coupling part number of 41299. Please make note of this change.</p>		

Crown P/N	Armstrong P/N	B & G P/N	Bore Size ID	Type
41100	810120-008	186410	5/8" X 1/2"	Iron
41101	816665-000	118476	5/8" X 5/8"	Iron
41102	806168-001	118723	1/2" X 1/2"	Iron
41288	810120-006	118709	1/2" X 5/8"	Iron
41289	810120-003	118473	1/2" X 1/2"	Iron
41299	806026-001	118705	1/2" X 1/2"	Iron
41300	Now is P/N 41299.			

Part Number: 41285-12
 Hydronic circulator lube oil - Extended Spout
Packaging: Bottled and boxed
Includes:
 12 - 4 oz. bottles per case
 A fine blend of hydronic circulator oil.
 The oil contains oxidation and corrosion inhibitors
 for maximum protection. Each bottle features
 a telescoping spout when dripping oil is an issue and for dispensing
 ease in hard to reach locations.

Woods Couplers & Rubber Sleeves

The Wood's Sure-Flex® coupler can be installed quickly and easily, because there are no bolts, gaskets, covers or seals. Alignment can be checked with a straightedge placed across the outside of the precision-machined flanges. The teeth of the sleeve lock into the teeth of the flanges without clamps or screws. There is no rubbing action of metal against rubber to cause wear. Couplings are not affected by abrasives, dirt, or moisture. This eliminates the need for lubrication or maintenance, provides clean, dependable, quiet performance.

J - SERIES FLANGES

Type J flanges size 3 and 4 are manufactured of sintered carbon steel. The powdered metal manufacturing process provides high dimensional accuracy and uniform material properties for high strength. Size 5 and 6 are made of high strength cast iron.

S - SERIES FLANGES

Type S flanges are die cast of high strength cast iron and all are finished bored to size for a slip on fit on a standard shaft.

They too can be used in combination with the standard JE rubber inserts.

All flanges are bored-to-size for a slip fit on standard shafts. Type J flanges can be used with sleeves of any construction except the Hytrel. Each flange has a key seat and one (1) set screw over the keyway.

Part Number	Description
41904	WOODS COUPLER 3J X 1/2

Flexible sleeves for Wood's Sure-Flex couplings are available in four materials (EPDM, Neoprene, Hytel and Urethane) and in three basic constructions. The most common ones being listed here.

J sleeves are molded EPDM rubber (E) or Neoprene (N). They are available in one-piece solid construction (JE, JN) or one-piece split construction (JES, JNS). These sleeves may be used in any Sure-Flex flange within a given size.

JE - SERIES SLEEVES

Woods Couplers & Rubber Sleeves

These sleeves are of two-piece design with a retaining ring. They are available in EPDM (E). They may be used with any flange within a given size.

H (Hytre) sleeves, are designed for high-torque applications, transmit four times as much power as an equivalent EPDM or Neoprene sleeve.

E - SERIES SLEEVES 2 PC WITH BAND

Part Number	Description
53170	WOODS EPDM SLEEVE 4E - 2 PC
53171	WOODS EPDM SLEEVE 5E - 2 PC
53172	WOODS EPDM SLEEVE 6E - 2 PC

Section 7 - Oil Handling, Gauges, & Smoke Bombs

Part Number: 40360

Miller oil line kit

Packaging: Poly bagged & tagged

Includes:

- 1 - 13494 elbow adapter
- 1 - 40459 flare reducer
- 1 - 40361B 3/16" Dia. X 7" Long oil line
- 1 - 40362B 3/16" Dia. X 11" Long oil line
- 1 - Instruction sheet

This convenient kit has everything you need to update a variety of Wayne burners, as well as, Miller mobile gun furnaces equipped with power oil burners.

Part Number: 40470

Anti-Hum Device - Silent Flow

Packaging: Individually boxed

Includes:

- 1 - Silent flow with 1/2" adaptor spring.
- For use on all domestic type pressure atomizing oil burners. Silent flow includes a 1/2" adaptor for use with 1/2" Dia. copper tubing and an easy to follow instruction sheet. Simple to install and effective in reducing oil line noise.

Characteristic's

Color	White
Surface Area, in²	52
Volume, in³	12
Firing Rate, GPH	10
Clean Press. Drop	0.4
Dirt Capacity, oz.	1.4
Ending Press. Drop	10.00
Filtration Depth	Medium
Micron Range	25 to 50

Part Number:
 41420-12 (Replaces General 2A-700A)
 Oil Filters - Felt type 2A-700A
Packaging: Individually bagged with gaskets
Includes:
 12 - Individual filters with gaskets.
 Made for domestic fuel oils. Made of felt discs. This 40 micron rated filter removes impurities that might hamper the burner's operation.

Part Number: **Wool Brand Filters - Bulk**
 41421-30 (Replaces Fulflo FB-10")
 Oil Filters for Fulflo - String type
Packaging: Bulk & corrugated carton
Includes:
 30 - Individual filters **WITHOUT** gaskets.
 Made for domestic fuel oils. Made of all wool string. This 40 micron rated filter removes impurities that might hamper the burner's operation.

FB-6 & FB-8 ARE NO LONGER AVAILABLE

Part Number: **Wool Brand Filters - 6 Pk.**
 41421-06 (Replaces Fulflo FB-10")
 Oil Filters for Fulflo - String type
Packaging: Poly bagged
Includes:
 6 - Individual filters **WITHOUT** gaskets.
 Made for domestic fuel oils. Made of all wool string. This 40 micron rated filter removes impurities that might hamper the burner's operation.

FB-6 & FB-8 ARE NO LONGER AVAILABLE

Part Number (s):
 41440 (individual filter)
 41440-12 (case of 12 filters)
 Wix oil filter elements #24104
Packaging: Individually boxed
Includes:
 1 - boxed filter or
 12 - boxed filters in a master carton.
 Heating Units, Small Engines & Steam Jennies
 This spin-on filter provides effective filtration for a number of applications. The steel housing is strong and durable while the paper filter element delivers a clean supply of fuel for faultless combustion.
 UL Recognized strainer for #2 oil or lighter.

- Specifications:**
- Dimensions 4 1/2" Hgt. X 2 5/8" OD
 - Maximum flow rate is 6 GPH
 - Compact design
 - Micron rating is 10

10 MICRON

Part Number(s):
 41415-48 (Case of 48 filters with gaskets)
 41415-12 (Economy case of 12 filters with gaskets)
 Oil Filters - String type for FB-4
Packaging: Bagged w/gasket in corrugated carton
Includes:
 48 or 12 - Individual filters with gaskets.
 Made for domestic fuel oils. Made of all wool string. This 40 micron rated filter removes impurities that might hamper the burner's operation. Replaces FB-4 elements.

Part Number(s):
 41439 (Complete UL listed filter system - Individually Pkg.)
 41439-06 (Complete UL listed filter system - 6 Pack)
 Oil Filters UL - Quick Spin III
Packaging: Individually boxed
Includes:
 1 - Individually boxed filter system or
 1 - 6 pack of boxed filter system.
 Our newly designed Quick Spin III™ filtration system is now better than ever! It's the filter style of the future with our new triple leak protection shell that is tin plated carbon steel, epoxy coated, and an internal plastic base to prevent rust-out bottoms that other comparable filters are prone to.
 As always our triple leak protection filter head is made of casted aluminum and incorporates a post gasket seal, a ridged rim that grips the seal gasket, and an outter lip that encloses the entire unit...safety first! And don't forget the practical benefits like a flat bottom, so your can doesn't spill oil all around the floor.
 Our wholesale distributor's like the flat bottom design because they stack easily and our kit variety means they can offer a wider range of filtering combinations to meet their customers needs.
 To top it off our Quck Spin III™ filtration system is UL listed for use in the USA and Canada with superior 10 micron filtration that effectively removes rust, scale, and other microscopic impurities that might hamper burner operation.

Filter Characteristic's for 41439
 Canister type.....Carbon steel, tin plated & epoxy coated
 Melting point.....1100°F
 Certification.....UL & CUL Listed
 Micron Rating.....10
 Dimensions.....4 5/8" H x 3 7/16" DIA
 Rated flow rate.....25 USgph
 Filtering area.....550 square inches
 Rated work psi.....12 P.S.I.
 Filtering media.....Resin treated cellulose
 Rated work temp.....Up to 140°F
 Max. working psi.....35 P.S.I.

UL file number.....MH 25548
 UL Style.....41439

Our 41439 Filter Replaces or fits:

- Crown:** Quick-Spin I & II
- Garber:** 11V-R
- Mitco:** 290M and 264-91M
- Nozzle Guard:** NG-3300-G
- Sid Harvey:** 290-6 and 264-91
- Westwood:** F100-10
- Wix:** 24100

Part Number(s):
 41436 (Individually boxed element w/gasket)
 41436-06 (6 pack of individually boxed element w/gasket)
 Oil Filter - QS III element only
Packaging: Individually boxed w/gasket & 6/pack ctn.
Includes:
 1 - Individually boxed filter element with gasket or
 6 - Individual boxed filter elementd with gasket in carton
 Designed for superior filtration, 10 micron!
 Our Quick Spin III™ replaces Gar-Ber's® R cartridge and mounts on existing Gar-Ber® heads, or you can use our own (see part number 41437).

UL listed for use in USA and Canada

- 1 - Mounting head
- 1 - Vacuum gauge 0 - 30 hg, 1/8" NPT

 UL file: MH25548
 UL Style: 41439

Part Number: 41436M

Oil Filter UL - Quick Spin III - kit #3

Packaging: Individually boxed

Includes:

- 1 - Filter element
- 1 - Mounting head
- 1 - Mounting bracket with hardware

 UL file: MH25548
 UL Style: 41439

Part Number: 41403

Filter mounting bracket

Packaging: Individually bagged & tagged

Includes:

1 - mounting bracket with hardware.
 Our steel zinc plated bracket will stand up to a variety of hostile environments and vibrations.

Part Number: 41437

Filter mounting head for QS III

Packaging: Individually bagged & tagged

Includes:

1 - filter head mount - with plugged gauge port.
 The "Quick Spin III™" head mount is made of casted aluminum. The head includes two 3/8" NPT, inlet & outlet ports and a 1/8" NPT gauge port, loc-tight sealed and plugged (vacuum gauge not included).

Part Number: 41431

Filter adaptor kit for QS III

Packaging: Individually bagged & tagged

Includes:

1 - adaptor kit mounting rod with gaskets.
 Our adaptor kit allows you to mount our Quick-Spin III™ filter onto General 1A25A & 264 heads for easy modification and adaptation without welding. Use existing heads for maximum filtration with just a couple twists of the wrench. A great way to improve filtration without extra effort.

Part Number (s):

- 41402 - Vacuum gauge (0 to -30" Hg. - 1/8" NPT)
- 41402C - Vacuum gauge (0 to -30" Hg. - 1/8" NPT - Color)
- 41406 - Vacuum gauge (0 to -30" Hg. - 1/4" NPT)

Packaging: Individually Boxed

Includes:

1 - vacuum gauge boxed from the above list.
 Our vacuum gauges features a easy to read 2" face, is made of high impact acrylic bezel, with a 1/8" or 1/4" NPT bottom mount. Can be used in a variety of applications.

- 41405 - Pressure gauge (0 to 300 PSI - 1/4" NPT)
- 41452 - Pressure gauge (0 to 30 PSI - 1/4" NPT)
- 41456 - Pressure gauge (0 to 200 PSI - 1/8" NPT)
- 41457 - Pressure gauge (0 to 300 PSI - 1/8" NPT)
- 41466 - Pressure gauge (0 to 60 PSI - 1/8" NPT - 1 1/2" FACE)

Packaging: Individually Boxed

Includes:

1 - pressure gauge boxed from the above list.
 Our pressure gauges features a easy to read 2" face, is made of high impact acrylic bezel, with a 1/8" or 1/4" NPT bottom mount. Can be used in a variety of applications.

BACK MOUNT
41466

Part Number (s):

- 41460 - Tridicator gauge (2.48" Long Stem X 2 1/2" Dial)
- 41461 - Tridicator gauge (2.75" Long Stem X 4" Dial)
- 41462 - Tridicator gauge (3.62" Long Stem X 2 1/2" Dial)

Packaging: Individually Boxed

Includes:

1 - tridicator gauge from the above list.
 Easy to read 2 1/2" face, made of drawn steel with corrosion resistant paint, center back mounting and a high impact polycarbonate window with chrome plated steel ring, with a 1/4"-18 NPT thread. Dual temperature ratings are: 70° F to 320° F / 20° C to 160° C and the pressure range is 0 to 200 PSI. It can be used in a variety of applications.

41460 & 41462

41461

Part Number: 41463

Thermometer with spud well

Packaging: Individually Boxed

Includes:

1 - Thermometer individually boxed.
 Easy to read 2 1/2" face, is made of drawn steel with corrosion resistant paint, center back mounting and a high impact polycarbonate window with chrome plated steel ring, with a 1/2" NPT removable brass well (2" long from back plate of gauge). Dual temperature ratings are: 32° F to 248° F and 0° C to 120° C. It can be used in a variety of applications.

Part Number: 41464

Pressure gauge for Steam

Packaging: Individually Boxed

Includes:

1 - Thermometer individually boxed.
 Easy to read 8 1/2" glass face, 1/4" NPT bottom mount in a steel case. 0-30 psi an industry standard. It can be used in a variety of steam applications.

Section 7 - Oil Handling, Gauges, & Smoke Bombs

Part Number (s):

41473 - Compound Gauge - Color Coded
 Compound gauge - Color coded

Packaging: Individually Boxed

Includes:

1 - compound gauge boxed.

Our compound Hg / PSI gauge is color coded for easy viewing and features an easy to read 2" face, is made of high impact acrylic bezel, with a 1/8" NPT, bottom mount. Can be used in a variety of applications. Senses Hg. Vacuum from 0 to 30 Hg and pressure from 0 to 30 PSI. It works great in applications where back pressure is present. Or if your not sure if there is back pressure. Don't take a chance on traditional Hg./Vac gauges. This little investment can save you lots of headache time. Stock up today!

Part Number: 43030

Tank gauge - Rope type

Packaging: Individually boxed

Includes:

1 - Tank gauge

Our tank gauge is designed in Germany and can be used in 44" oval tanks with at least one 1 1/2" diameter bushing. The cord is impervious to oil and durable. This gauge features an easy to read 2 1/2" face and extra large easy to read number and letters. an be adapted to use in 2" bushing with adaptor. (not included).

Part Number: 43031

Tank gauge - Rope type

Packaging: Individually boxed

Includes:

1 - Tank gauge

Our economy tank gauge is used in 42" & 24" tanks with face plate change & 2" BPS mounting thread. The cord is impervious to oil and durable.

TUV Tested Flow Control® de-aerator

Part Number: 43000 - TUV Tested Flow Control®

De-aerator - Flow Control®

Packaging: Individually boxed

Includes:

1 - Flow Control® de-aerator & hardware

1 - Installation instructions

Flow Control® is a unique product that allows for the safest possible transport of oil between the oil tank and the oil burner.

Incorporating the advantages of the two pipe system in only one oil line. Prevent break-downs before they occur due to air, dirt, and nozzle clogging. This product works!

TUV IMPROVED!

Look at all the advantages

- ♦ Fewer breakdowns
- ♦ No return line leakage
- ♦ Less soot build-up
- ♦ Simpler and cheaper installations
- ♦ Cleaner exhaust gases
- ♦ Smaller pipe dimensions
- ♦ Lower oil consumption
- ♦ Easier trouble spotting
- ♦ More burners on one suction line
- ♦ Fewer problems with suction leakage and long oil lines
- ♦ Pre-heated oil

Technical Data:

Max. nozzle capacity: 18.5 GPH
Separating capacity: Up to 4 l/h
Operating suction pressure: 7.5 psi max.
Pump connections: 1/4" NPT inner thread

Max. return oil pumped: 37 GPH
Max. ambient temp.: 140°F (60°C)
Operating over pressure: 10 psi max.
Tank connection: 1/4" NPT inner thread

Max. oil flow: 50 GPH
Max. operating temp.: 140°F (60°C)
Pressure test of pipe system: 85 psi max.
Dimensions: 3.74" X 3.74" X 5.73"

Part Number: 43003
 Fusible Valve - 3/8 (F)NPT X 1/4 (M)NPT
Packaging: Poly bagged & tagged
Includes:
 1 - Firomatic® Fusible Valve Designed to automatically close when acted upon by heat of 165° F, manufactured primarily for oil burner installations. This valve has been designed with the fusible element in the handwheel, simply replace the low cost handwheel to reset and restore the valve, eliminating the need to replace the valve. These valves can be operated manually and are provided with self-adjusting stuffing box and back seat features, which prevents leaks at the valve stem.

3/8" (F) NPT 1/4" (m) NPT

Part Number:
 43005 - 24" L x 1/2" Flexible Hose
 43006 - 36" L x 1/2" Flexible Hose
 Oil lines - Flexible Steel Braided Hose
Packaging: Poly bagged & tagged
Includes:
 1 - Flexible hose from above list with 1 adaptor fittings
 These hoses have a 1/4" NPT fittings on both ends, for expediting the installation of the Tigerloop® or Flow Control® de-aerator. Made from Perbunan rubber (inside), which is impervious to oil, water and air. This product has a diversity of uses.

Extra adaptors are available, our P/N: 43009

Specifications

- Pressure rating: 143 psi
- Max. Operating Temp: 165° F
- Max. Flow Rate: 20 GPH
- Suction: 6 Bar

NOTE: Fits or replaces Buderus #108902

Part Number:
 43019 - 24" L x 1/2" Flexible Hose
 43020 - 36" L x 1/2" Flexible Hose
 Oil lines - Flexible Steel Braided Hose
Packaging: Poly bagged & tagged
Includes:
 1 - Flexible hose from above list
 We are proud to introduce our new 36" long galvanized blue braided hose.
This hose features:
 (2) 3/8" female flare swivel ends to accommodate swinging door burner installations and hose replacement.
 -No more hose twisting!
 -Inside flare ensures a snug fit.
 -Swivel ends make installation simple.
 -Tested by the manufacturer to meet industry standards.

Part Number:
 43021 - 36" L x 1/2" Bio-fuel flexible hose
 Oil lines - Flexible Steel Braided Hose
Packaging: Poly bagged & tagged
Includes:
 1 - Flexible hose from above list with 1 adaptor fittings
 These hoses have a 1/4" NPT fittings on both ends, for expediting the installation of the Tigerloop® or Flow Control® de-aerator. This oil- and fuel-resistant flexible elastomer hose is fitted with galvanized steel wire braiding as a pressure or strength bearer. The polymer basis of the inner core is HNBR (hydrogenated butadiene acrylnitrile rubber) which is highly resistant to high temperature. Suitable for use with biodiesel. This product has a B100 Bio-fuel rating. Look for the "Green Colored" braid.

Extra adaptors are available, our P/N: 43009

Specifications

- Pressure rating: 143 psi
- Max. Operating Temp: 165° F
- Max. Flow Rate: 20 GPH
- Suction: 6 Bar

NOTE: Fits or replaces Buderus #108902

Section 7 - Oil Handling, Gauges, & Smoke Bombs

Part Number:

43022 - 24" L x 1/2" Flexible Hose
 43023 - 36" L x 1/2" Flexible Hose
 Oil lines - Flexible Steel Braided Hose

Packaging: Poly bagged & tagged

Includes:

1 - Riello™ Flexible hose from above list
 These hoses have a 1/4" (m)NPT removable fittings on one end, swivel fitting and a Riello British male thread on the other end. It's a "one, two punch" equates to easy installation and maintenance of Riello burners. The swivel really speeds up the installation process. Made from Perbunan rubber (inside), which is impervious to oil, water and air.

BRITISH THD'S.

Part Number: 45673

Pump strainers - Model "A & B"

Packaging: Individually boxed with gasket

Includes:

Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec models A & B pumps. Suntec part #: 3715744 - (1 5/8" tall).

Part Number: 45674

Pump strainers - Model "J,H,S,"

Packaging: Pkg. of 4 strainers with gaskets

Includes:

4 - Strainers and 4 - Strainer gaskets
 Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec models J and H pumps. Suntec part #: 131622 - (2 1/8" tall).

Part Number: 45675

Pump strainers - Model "A"

Packaging: Pkg. of 4 strainers with gaskets

Includes:

4 - Strainers and 4 - Strainer gaskets
 Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec model A70 pumps. Suntec part #: 3715101 - (1 1/8" tall).

Part Number: 45676

Pump strainers - Model "J,H,S,"

Packaging: Individually boxed with gasket

Includes:

Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Suntec part #: 131622 - (2 1/8" tall).

Part Number: 45677

Pump strainers - Model "B"

Packaging: Individually boxed with gasket

Includes:

Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec models A pumps. Suntec part #: 3715171 - (1 3/8" tall).

Part Number: 45678

Pump strainers - Model "A"

Packaging: Individually boxed with gasket

Includes:

Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec model A70 pumps. Suntec part #: 3715101 (1 1/8" tall).

Part Number: 45678-50
 Pump strainers - Model "A"
Packaging: 50 Boxes per case
Includes:
 50 individually boxed strainers with gaskets packed in a master carton.
 Don't get caught short handed. Buy'em by the case!
 Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec model A70 pumps. Suntec part #: 3715101 - (1 1/8" tall).

Part Number: 45685
 Pump strainer kit - B2GA
Packaging: Individually boxed with gasket
Includes:
 Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec model B2GA-8852
 Replaces Suntec part #: 3715746 (2 1/16" tall).

NEW!

Part Number: 45681
 Pump strainer - Riello™
Packaging: Individually boxed w/O-ring gasket
Includes:
 1 ea. Strainer and 1 ea. matching O-ring gasket. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Gasket is impervious to oil. Used on models F3 to F20 and R35. Riello part #: 3005719

Part Number: 45686
 Pump strainer - Model "K"
Packaging: Individually bagged with gasket
Includes:
 Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec model "K" pumps (not for gear set with 6 screws)
 Replaces Suntec part #: 131066.

NEW!

NOTE: Riello optional pump cover gasket is available
 Ask for P/N: 60682 sold in 10 - 25 - 100 pks.

Part Number: 45683
 Pump strainer - Danfoss kit
Packaging: Individually boxed with o-ring
Includes:
 Strainer and o-ring gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Danfoss models BFP pumps. 2 bolt cover.
 Replaces P/N: 071N1392
 NOTE: Also fits the Beckett Clean Cut Pump.

NEW!

Part Number: 45687
 Pump strainer - Levitt R3
Packaging: Individually boxed with gasket
Includes:
 Strainer and o-ring gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec Levitt R-3 pumps.

NEW!

Part Number: 45684
 Pump strainer kit - B2TA
Packaging: Individually boxed with gasket
Includes:
 Strainer and matching gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Suntec model B2TA-8851
 Replaces Suntec part #: 3715742 (1 5/8" tall).

NEW!

Part Number: 45688
 Pump strainer - Danfoss CFP
Packaging: Individually boxed with gasket
Includes:
 Strainer and o-ring gasket as specified above. Made of stainless steel mesh, attached to sturdy nylon ends for long lasting support. Our ribbed design insures maximum filtration. Used in Danfoss models CFP pumps. 4 bolt cover.
 Replaces P/N: 071H0015

OSVA38 - 3/8" Oil Safety Valve
 OSVA50 - 1/2" Oil Safety Valve
 Oil safety valves - Webster® Standard

Packaging: Individually boxed

Includes:

1 - Webster® oil safety valve from above list
 The Webster® oil safety valve is ideal for use in oil supply systems which have from zero to 60 psi supply line pressure on the inlet side of the valve, but requires a sustained vacuum on the outlet side of the valve for the fuel to flow to the burner pump. This unit is UL Listed for #2 fuel oil or lighter at 60 psi maximum inlet pressure.

Look at all the advantages:

- Relieves pressure strain on fuel pump inlets*
- Prevents siphoning of fuel tanks*
- Prevents spilling due to accidental line breakage*
- Use OSVA38 for 3/8" pipe & ports 3/8 - 18 NPTF
- Use OSVA50 for 1/2" pipe & ports 1/2 - 14 NPTF

BIO VERSION

Packaging: Poly bagged & tagged

Includes:

1 - Fusible Valve, Tank Valve & Check Valve from above list
 Designed to automatically close when acted upon by heat of 165°F, unless otherwise specified. These valves has been designed with the fusible element in the handwheel, simply replace the low cost handwheel to reset and restore the valve, eliminating the need to replace the valve. These valves can be operated manually and are provided with self-adjusting stuffing box and back seat features, which prevent leaks at the valve stem. Valve bodies are made of machined brass or cast brass to reduce the erosion caused by fuel oil. The other internal parts are designed for long life and dependability. The best in it's class! All the fusible valves up to 1/2" NPT are UL listed in the US & Canada!

See Photos on next page

Part Number: 1002FD
 Valker® Fast Drying De-greaser

Packaging: Corrugated carton - sold in case lots only.
Includes:

12 - 14 oz. aerosol cans per case.
 This dielectric, non-flammable solvent is fast drying, and ideal for de-greasing small mechanical parts, fans, electric motors, and equipment. Removes grease and oil from hard to reach places. It can even be used as a spot remover.

Part Number(s):
 41900 - 1/2 Minute smoke candle - 12/pk. - 4,000 cu. ft.
 41901 - 1 Minute smoke candle - 12/pk. - 8,000 cu. ft.
 41902 - 3 Minute smoke candle - 12/pk. - 40,000 cu. ft.
 Smoke Candles - Superior

Packaging: Poly-bag
Includes:
 1 - 12/pk. and 5/pk., of each from above list.
 Our Superior smoke detectors generate smoke by chemical reaction to pinpoint leaks in heating and air conditioning duct work. Smoke varies in color from white to gray depending upon density and lighting.
 Now featuring new quantity packaging! Now available in packages of 5 for the 1/2 minute, 1 minute and 3 minute sizes.

Part Number: 2001CF
 Valker® Chem Flush - 1

Packaging: Corrugated carton - sold in case lots only.
Includes:

12 - 14 oz. aerosol cans per case.
 Chem-Flush - 1 opens fuel lines that are plugged due to ice and sludge build-up. Chem flush - 1 can also be use to clean the filter pump and nozzle strainer when used as a full maintenance or tune-up product. Therefore, greatly reducing the number of service calls due to plugged fuel lines during the heating season.

-WARNING-
 STORE IN A COOL / DRY PLACE -

Part Number: 2007CV
 Valker® Chem Flush Valve

Packaging: Bulk - sold per each.
Includes:

1 - Chem flush valve.
 The Chem-Flush - 1 valve is required when using Chem-Flush - 1 aerosol P/N: 2001CF. The valve consists of a dispensing cap, flow sight tube, pressure gauge, pressure relief valve with a threaded portion for easy adaption of a standard CO² gun.

Part Number: 41950
 Smoke test paper

Packaging: Poly bagged & tagged
Includes: 1 package of 50 strips
 Smoke test paper for Bach & Dwyer testers
 Packed in a re-sealable zip lock bag with a generous supply of 50 strips per package.

Part Number: 2008CT
 Valker® Sight tube with cap

Packaging: Poly bagged & tagged
Includes:

1 - Replacement sight tube
 This replacement sight tube is used in the Chem-Flush valve.
 They are sold per each.

 Smoke Emitters - Regin

Packaging: Various
Includes:
 1 - Pkg. from the above list
 Our smoke emitters generate smoke by chemical reaction. Reveals leaks and other faults in heating and air conditioning duct work. Unique plastic cartridge makes for easy handling and disposal.

Part Number(s):

- 12-7300 (Large rectangular)
- 12-7400 (Large round)
- 12-7500 (Small rectangular)
- Telescoping inspection mirrors

Packaging: Poly bagged & tagged

Includes:

1 - Mirror from above selection with extension handle.

Ideal for inspecting burner flame and inside chamber liners. Features three section telescoping action. 29-31" maximum extension. Swivel joint permits viewing from any angle. Mirror is made of highly polished stainless steel for maximum strength.

12-7300

Caution: Mirror should not be held directly in path of flame. Safety first!

Part Number: 12-EL26

Telescoping pocket lighter

Packaging: Poly bagged & tagged

Includes:

1 - Telescoping lighter tool.

Safety first!. Whether a gas or oil manual ignition test don't get caught without one of these. Light furnaces of all kinds from a safe and comfortable distance. Our lighter extends to 26", for burn free lighting. Our tool also features a pocket clip, and a bright nickel plated finish.

Part Number: 12-EM18

Telescoping pocket magnet

Packaging: Poly bagged & tagged

Includes:

1 - Telescoping magnet tool.

This handy device is a life saver in recovering dropped parts in hard to reach areas, with limited space. A necessity for any tool box. Tool features include a pocket clip, 18" extension reach, and a bright nickel plated finish.

Part Number(s):

- 12-T180 (Temp. range -40 to 160 degrees Fahrenheit)
- 12-T220 (Temp. range 0 to 220 degrees Fahrenheit)
- Thermometers - Pocket dial

Packaging: Poly bagged & tagged

Includes:

1 - Pocket thermometer of choice with casing

Used in a variety of applications: Heating, AC, Refrigeration and Laboratory use to mention a few. This tool features a unbreakable lens, 5" stem, protector sleeve with clip. The pocket clip also holds the thermometer in place.

Part Number: 12-T302

Thermometers - Digital pocket dial

Packaging: Shell packaged for display

Includes:

1 - Digital Pocket thermometer & casing

Used in a variety of applications: Heating, AC, Refrigeration, food and Laboratory use to mention a few.

This tool features a flat edge non-roll case, stainless steel 5" stem, large display, on/off switch, instant one second update. It has a temperature range of -40 to 302 degrees Fahrenheit and switchable to -40 to 150 degrees Centigrade. The protector sleeve has a pocket clip that also holds the thermometer in place and the battery is included.

Part Number: 12-T3N1

Telescoping mirror, magnet & light kit

Packaging: Shell packaged for display in case

Includes:

- 1 - Telescoping mirror,
- 1 - Telescoping magnet & light tool
- 1 - Sturdy case

This sturdy plastic case keeps your kit safe from damage in your tool box. Each kit contains a telescoping round mirror 2" in diameter that extends to 36" and a telescoping 5 lb. magnet with a built in LED light that extends to 26" to guide the way. This tools also features non-slip, textured PVC coated handles, batteries are included, ready to use off the shelf.

NEW

Section 8 - Tools, Glass, Washers & V-Belts

Part Number: 40400
 Tools - Terminal crimping
Packaging: Poly bagged & tagged
Includes:
 1 - Terminal crimping tool in poly bag.
 Our tool is lightweight, and economical.
 This multi-purpose tool is made for durability.
 Handles are plastic coated for comfort.

- Four Tools In One -
- Bolt cutter - Wire cutter - Crimper - Wire stripper

Part Number: 40402
 Tools - Coupling cutter
Packaging: Poly bagged & tagged
Includes:
 1 - heavy duty coupling cutter.
 Cuts all sizes up to 1 1/4" in diameter.
 Cuts polyethylene, PVC, ABS, and rubber
 hose materials. Will not distort pipe shape
 when cutting.

For replacement blades for 40402,
 Use **P/N: 40403** (a pack of two).

NEW

Part Number: 40403
 Tools - Replacement blades for 40402
Packaging: Poly bagged & tagged
Includes:
 1 - 2 pack of replacement blades for 40403 tool.
 The blades are sharp. Please exercise caution when
 replacing blades.

Part Number: 40406
 Tools - Lineman's pliers
Packaging: Poly bagged & tagged for display
Includes:
 1 - heavy duty lineman's crimping tool.
 This 9 1/2" long tool is a multi-tasker in the field.
 It cuts, and crimps our and terminal connector very
 sure and secure. Solid steel construction with foam type
 handles for a sure grip!

FEATURES

- * CROSS SECTIONED JAWS
- * INDUCTION HARDENED CUTTING EDGES.
- * HOT RIVETED JOINTS
- * TEXTURED NON-SLIP GRIP

NEW

Part Number: 40407
 Tools - Automotive crimper - Manual

NEW

Packaging: Poly bagged & tagged

Includes:

1 - Automotive Terminal crimping tool in poly bag.
 An automotive favorite and wire harness builder for the HVAC Tech. An essential for the service-person in the field for "on the fly" wire harness modifications. Made of high carbon steel with black oxide finish and plastic hand grips for a sure grip.

- Four Tools In One -
- Bolt cutter - Wire cutter - Variety Crimper - Wire stripper

Part Number: 40408
 Tools - Automotive crimper - Ratcheting

NEW

Packaging: Poly bagged & tagged

Includes:

1 - Automotive Terminal crimping tool in poly bag.
 An automotive favorite and wire harness builder for the HVAC Tech and wire harness pro. Create "sure" connections in high use areas, An essential for the service-pro in the field for "on the fly" wire harness modifications. The positive ratcheting mechanism adjusts for perfect crimps. Supplied with a variety of crimping jaws that cover a wide variety of wire terminals. Never get caught without the "right" tool. A hardened steel frame design insures longevity and plastic hand grips for a sure grip.

Part Number:
 40417 (for 1 soot kutter)
 40417-12 (for 12 soot kutters)
 Tools - Soot kutter

Packaging: Poly bagged & tagged for display

Includes:

1 - Soot kutter or 1 - 12 pk. of soot kutters
 Our Soot Kutter is specially designed for easier clearing of soot build-up in most narrow passage boilers. Effectively breaks up hardened carbon deposits. Handle is plastic coated for comfort.

Soot Kutter!

32" Over-all Length

Section 8 - Tools, Glass, Washers & V-Belts

Part Number: 40420
 Tools - Porcelain & gauge glass cutter
Packaging: Poly bagged & tagged
Includes:

1 - Tool with cutting chain.
 The industry standard and design for cutting insulators and gauge glass in the field. Simple to use, as a pair of pliers. Plastic coated handles for comfort grip.

Squeeze & Pop!

Part Number: 40421
 Tools - Hex key set
Packaging: Plastic holder
Includes:

1 - Holder with 8 hex keys
 Sizes are:
 .050, 1/16, 5/64, 3/32, 1/8, 5/32, 3/16, & 7/32
 The two smallest sizes .050 and 1/16 are 1 3/4" long. All the others are 6" long. The plastic holder ensures you'll never mis-place a hex key ever again, an essential for any tool box.

Part Number: 40424
 Tools - Plier style glass cutter
Packaging: Poly-bagged & tagged
Includes:

1 - Gauge glass cutter
 The plier style gauge glass cutter offers good leverage on scoring the glass tubing by a conventional means that most mechanics are familiar with.

Part Number: 40425
 Tools - Squeeze rod style glass cutter
Packaging: Poly-bagged & tagged
Includes:

1 - Gauge glass cutter
 Works similar to the plier style gauge glass cutter. It offers good leverage on scoring the glass tubing by a means squeezing flexible rods together.

Part Number(s):
 40428 (Standard blowout gun)
 40429 (Gun with 150 psi safety valve)
 Tools - Blowout guns
Packaging: Poly bagged & tagged

Includes:
 1 - Blowout gun and instruction sheet.
 Our blowout gun uses a CO² cartridge (sold separately) and incorporates a 1/4" NPT female connection, that can be adapted to other fittings. It is intended for use in blowing out clogged lines that are vented beyond the restricted point to the atmosphere. It should not be used in a closed end line. Applications include fuel oil lines, machine lubrication systems, instrument transmission lines, and hydraulic pipelines.

The blowout gun with the built in check valve allows the user the ability to remove used CO² cartridges without pressure line loss. You can then add additional CO² cartridges as needed, up to 150 psi.

Replacement O-rings are available ask for P/N: 40427-10

P/N: 40428

P/N: 40429

Part Number: 40430
 Tools - Electrode tip benders
Packaging: Poly bagged & tagged
Includes:
 2 - Tip benders.
 Made of steel with a plated finish. Used for bending and adjusting electrode and igniter tips, this lightweight tool is pocket size and easy to use. One end accommodates 1/8" tips and the other 3/32" tip. A must to take on every service call.

Part Number(s):
 40431 (Control Blast - only)
 40431K (Control Blast with 3 - 12g cartridges)
 40432K (Control Blast with 3 - 16g cartridges)
 Tools - Control Blast blow-out gun
Packaging: Poly bagged & tagged
Includes:
 1 - Control Blast gun or kits from above list
 Crown puts you in control with our new trigger activated blow out gun and our new bigger and better 12 or 16 gram CO² cartridge. Together they supply the "control" and power "blast" you need to get rid of stubborn oil line clogs.

Control Blast

Part Number: 40434
 Tools - Eliminator Tape Measure
Packaging: Shell packaged
Includes:
 1 - Tape measure 7/8" W tape X 25 Ft. Long
 A patent hook allows for un-assisted measurements on long pipe lengths. It's "The Pipe Friendly" tape measure with easy to read fractional markings. A must have for the tool box for the plumber in you!

NEW!

Part Number: 40436
 Tools - Ratchet box wrench
Packaging: Poly bagged & tagged for display
Includes:
 1 - Ratchet combo box wrench
 Made of steel with a plated finish.
 Accommodates a 1/4" hex and a 5/16" hex.

Part Number: 40437
 Tools - Nozzle Wrench
Packaging: Poly bagged & tagged
Includes:
 1 - Nozzle Buddy Wrench
 Our "Nozzle Buddy," tool gets the job done! Install and remove nozzles with ease. Works on all nozzle brands and most adaptors..
 IMPROVED PIN STRENGTH.

NOZZLE BUDDY

Section 8 - Tools, Glass, Washers & V-Belts

Electrode Setting Gauges

Crown carries a full line of specialty setting gauges for Beckett, Carlin, and Wayne burners so that you get a perfect spray pattern every time you set an electrode. Why chance an unnecessary call back?. Set it right the first time with our original line of O.E.M. electrode setting gauges. But that's not all! Use Crown's universal electrode setting gauge if a specialty gauge is not available. It's quick and easy to use for setting all spray patterns!

Crown Part Number	For Model Number	O.E.M. Name
40439	NX & AF II, HLX / AF2	Beckett
40441	AF, AFG, SR, SF & AF II with F & FB retention heads	Beckett Z Gauge
40442	SR Series Burner	Wayne
40443	AF, AFG, SR, & SF	Beckett
40444	Blue Angel HS	Wayne
40445	All Models	Various
40447	99-102	Carlin
40448	Elite	Carlin

Part Number(s):

40492-06 (6 pack - 12 gram CO² cartridges)
 40494-06 (6 pack - 16 gram CO² cartridges)
 CO² cartridges 12 & 16 gram

Packaging: Poly bagged & tagged

Includes:

1 - Of the above CO² charger combinations above.
 Intended for use in blowing out clogged oil lines with our blow out gun 40431 Control Blast. this product can be used in a variety of applications ranging from making seltzer water to use in CO² bb-guns.

Part Number: 49925

Tools - Webster vacuum breaker

Packaging: Poly-bagged & tagged

Includes:

1 - Vacuum Breaker with instructions.
 This handy device incorporates a Viton "O" ring seat, a 3/8-18 (f)NPT port. It can also be used as a supply line check valve.

Part Number: 695

Tools - Lineman's strip n' crimp pliers

Packaging: Poly bagged & tagged

Includes:

1 - Lineman's wire stripper and crimper
 This tool gives you all the benefits of a standard lineman's pliers plus wire stripping and terminal crimping features.
 A must have for the tool box!

Strip N' Crimp!

Part Number(s):

40490 (10 - 8gram cartridges per box)
 40490-12 (12 - 10 pk. boxes per case)
 40490-36 (36 - 10 pk. boxes per case)
 CO² cartridges - Std. 6 gram

Packaging: Boxed

Includes:

1 - Of the above CO² charger combinations above.
 Intended for use in blowing out clogged oil lines with our blow out gun 40428 or 40429, this product can be used in a variety of applications ranging from making seltzer water to use in CO² bb-guns.

Part Number: OSVA TOOL
 Tools - OSVA Tool

Packaging: Poly-bagged & tagged

Includes:

1 - OSVA Tool with instructions.
 This handy tool makes fuel pump priming operations look easy.
 Inexpensive yet effective.
 Another reason to stock and install Webster OSV valves.
 Our P/N's: OSVA50 & OSVA38!

Part Number: PTK-10M
 Pump test manifold tester kit

Packaging: Sturdy plastic case

Includes:

1 - Test kit
 Used to test pump pressure and cutoff of fuel oil pumps quickly and accurately.
 No need to remove pump from oil burner.
 Can be used on all pumps with operating pressures up to 300 psi.
 Use with vacuum gauge to analyze problems in oil lines caused by impurities, leaks and high restrictions.

Part Number: PTK-2M
 Pressure & cut off tester kit

Packaging: Sturdy plastic case

Includes:

1 - Test kit
 Tests pump pressure and cut-off of fuel oil pumps quickly and accurately without removing the pump from the oil burner.
 Can be used on all pumps with operating pressures up to 300 psi.

This Kit Features:

- Quick hook-up fittings make testing easy, clean and simple.
- Easy-to-follow step-by-step instructions
- Checks operating pressure & cut-off under actual operating conditions.
- Color coded hoses.
- Liquid filled gauge
- All brass body.
- High impact case.

This Kit Features:

- Quick hook-up fittings for easy testing.
- Accurately checks pressure, cutoff and vacuum under actual operating conditions.
- Liquid filled gauges for accurate readings.
- High pressure hoses for setting up today's higher pressure pumps.
- High impact case with handle.
- Complete with easy-to-follow instructions.
- Brass and high quality aluminum construction for long life.
- Color coded hoses for pressure hook-up.
- Clear tubing adapts to any suction line.
- Adapter fittings included for all pumps including Riello.

Part Number: PTK-T20
 Riello pump & vacuum tester kit

Packaging: Sturdy plastic case

Includes:

1 - Test kit

Designed specifically for testing Riello pumps and vacuum.

This Kit Features:

- Quick connect European thread fittings.
- Liquid filled gauges to dampen pulsation.
- No hydraulic shock.
- 24" color coded flexible lines.
- High impact plastic case.

Section 8 - Tools, Glass, Washers & V-Belts

Part Number: PTK-9183

Pump test kit

Packaging: Sturdy plastic case

Includes:

- 1 - Manifold
- 1 - Vacuum gauge
- 1 - Pressure gauge
- 1 - 1/8" NPT X 1/2" hex adapter
- 1 - 1/4" NPT X 1/2" hex adapter
- 1 - 6" Clear flexible hose w/fittings
- 1 - Instruction sheet

Our pump test kit performs a variety of tests. Benefits include the ability to trouble shoot pump failure, valve failure, and vacuum leaks all in one convenient kit.

Test Applications

- Operating Pressure Test
- Cut-Off Test
- Vacuum Test - Lift Application
- Vacuum Test - Fuel Unit

Part Number: SW1

Silicone Tape

Packaging: Poly-bagged & tagged

Includes:

1 - roll 1" W x 12 Yard x .020 thick Silicone tape. This product has thousands of uses. It has 300% elongation stretch capacity. It fuses to itself to form an inseparable bond after 24 hours at room temperature and is water resistant. A great low cost seal in electrical insulation, splicing, and wire wrapping applications. 500° F continuous temperature rating.

Part Number: WP-1

Tools - "W" glass cutter

Packaging: Poly-bagged & tagged

Includes:

- 1 - Gauge glass cutter

This "W" shaped gauge glass cutter offers good leverage in that the mechanic can really lean into the score with their body weight making for deep cuts and easy tap & snap secondary process.

AQUASTAT IMMERSION WELLS

Replacement Wells for Honeywell and White Rodgers. Sturdy brass and copper construction for long service life.

Gauge Glass Washers - Marvel®

What makes these washers different from others is its patinent molded lip design that ensures a sure seal. Made of standard EPDM rubber that can withstand up to 150 psi and 300° F constant pressure and temperature enviornments with outstanding longevity. The Marvel washers are sold in packages of 12 or individually.

Part Number(s):

- 70321 (Conbraco Quality Valve Set)
 - 70323 (same as 70321 but has safety check valve)
 - 70324 (Contains same as below, but 3/4 NPT & GG 16" L)
- Gauge Glass Valve Kit - Conbraco©

Packaging: Boxed & GG in corrugated tube

Includes:

MADE IN THE USA

- 2 - Protection rods
 - 1 - 5/8" OD X 12" Long standard gauge glass
 - 1 - 5/8" ID X 1/2" NPT top valve
 - 1 - 5/8" ID X 1/2" NPT bottom valve with clear out port
 - 1 - Instruction sheet
- Use for all types of liquid level verification; We stock the 1/2" NPT male pipe version, but 3/8" NPT is available upon request.

Features:

- Aluminum composition hand wheels
- EPDM gauge glass gaskets standard
- Automatic ball checks help prevent the loss of fluids should the glass be broken.
- Equipped with two copper guard rods
- Standard 1/4" needle drain valve in lower arm
- Rated: 125 psig @ 350°F, 300 psig @ 100°F (See note!)
- CRN Registered OF6616.5C

Note: Service ratings are subject to pressure/temperature ratings of gauge glass and glass gaskets.

'Apollo' Valves
 Manufactured by Conbraco Industries Inc.

Part Number:

- 70322 (5/8 ID kit)
 - 70325 (3/4 ID kit)
- Gauge Glass packing nut kit

NOTE:
 Packing nuts can be purchased individually.
 Use P/N: 58PN

Packaging: Boxed

Includes:

- 2 - 5/8" ID gauge glass packing nuts (58PN)
- 2 - 5/8" ID gauge glass washers (GGW58-12 or GGW58-100)
- 2 - 5/8" ID gauge glass friction rings (58BW-12)

This kit includes everything you need to repair leaking valves in the field. If individual items are needed specify the P/N's in parenthesis.

Part Number(s): 70320

Gauge Glass Valve Kit - Economy

Packaging: Boxed

Includes:

- 2 - Protection rods 10" L
- 2 - 5/8" ID X 1/2" NPT valve with clear out port
- 1 - Instruction sheet

A cheap economy valve. Features identical valves. Either one can be used as a bottom valve for installation ease.

 14" to 36" sold in 6 packs.
 48" & 60" sold individually.

Our Type I Clear Borosilicate glass has been an industry standard for eons!

Our glass tubing is widely used in low pressure steam boiler applications.

Easily cut to size in the field.
 - High Chemical Durability
 - High Hydraulic Resistance

Use Crown's premium Squeeze & Pop cutter #40420.

Sizes are standard, and we will cut to length upon request special lengths. Please call for price & availability.

3/4" DIA. STANDARD GAUGE GLASS

Sold individually.

Section 8 - Tools, Glass, Washers & V-Belts

Gauge Glass - High Pressure

Our popular Schott brand Borosilicate gauge glass is very durable.

5/8" DIA. HIGH PRESSURE DURAN® BOROSILICATE GLASS 3.3

Sold individually.

These are made from Schott's heat resistant Borosilicate® brand tubing. It is highly resistant to water, neutral, acid solutions, concentrated acids, acid mixtures, as well as chlorine, bromine, iodine and organic substances.

They are the most versatile and popular type used in our industry.

Application: Sight & flow indicators.

Benefits: Visual indication of liquid flow, contamination or discoloration of liquid, metering a constant rate of flow through a fixed port .

End Finish: Saw cut and fire-polished

NOTE: Harsh environments should be monitored daily. As temperatures rise so will corrosion levels. If clouding is observed replace tubing.

** MAXIMUM RECOMMENDED LENGTH IN THIS SERVICE IS 24"

DURAN® BRAND REDLINE GAUGE GLASS

It's very easy to spot liquid levels from a distance when you use our DURAN® brand redline tubular gauge glass. The red stripe on a white background gives a special optical effect which makes the liquid level stand out clearly. This feature allows for easy viewing of liquid levels from across the room.

1/2" Diameter

Sold individually.

5/8" Diameter

Sold per dozen (12 per case)
24" to 72" sold individually.

Stocked Odd Sizes

We stock the following odd sizes in 5/8" Dia. lengths: 8 1/2", 9 1/4", 9 1/2", 9 3/4", 10 1/4", 10 1/2", 10 3/4", 11 1/4", 11 1/2", & 11 3/4"

Other lengths are available.

Minimum quantities required on all special orders.

3/4" Diameter

Sold individually.

V- Belts - Fractional

**Don't gamble on another brand...
 We have the winning hand!**

Our Industrial V-Belts are designed for a wide variety of applications including heating and AC. All of our belts meet or exceed RMA standards and under-go ISO-9001 test standards. Our belts are constructed from tough, long-lasting synthetic rubber, reinforced with low elongation polyester cords. Specially designed synthetic rubber compounds give heat and oil resistance, which ensures that the belt will perform day after day in a wide range of ambient temperatures.

We typically stock a wide range of dual A / 4L series belts. All other series are considered non-stock and usually ship between 3 - 7 working days upon receipt of order.

Our Replacement Warranty

Our belts are warranted to be free from defects in materials and workmanship. This warranty is limited to replacing any belt, which is proven to be defective within 180 days from date of purchase under the following provisions:

- The belt was used in its designed application.
- The product is delivered to Crown with transportation charges prepaid (Call for RGA #)
- Analysis verifies that the product was properly handled, mounted, lubricated & not subject to abuse.

How To Order

- 1) Select desired belt: Fractional or Hi-Power.
- 2) Select top width and thickness desired.
Note: All of these belts are pitched at a 40 degree angle.
- 3) Select desired INSIDE length for A & B series or if ordering 3L, 4L or 5L, then select desired OUTSIDE length.
- 4) To order an A or B series belt that has an INSIDE length of 35", the part number would be A35 or B35.
- 5) To order a 3L, 4L, or 5L belt that has an OUTSIDE length of 35", the part number would be 3L350, 4L350 or 5L350.

RECOMMENDED ELECTRODE SETTINGS FOR MOST HIGH PRESSURE GUN-TYPE OIL BURNERS
 (Unless otherwise specified by burner manufacturer)

Recommended spacing over surface of an insulator between any part of the electrode and nearest grounded metal part, as indicated below.

Secondary Voltage of Ignition Transformer	Minimum Surface Distance Over Insulator
Not more than 6,000	1"
Not more than 10,000	1½"
Not more than 15,000	2"

Nozzle GPH	A	B	C
45° (.75 to 4.00)	1/8" to 3/16"	1/2"	1/4"
60° (.75 to 4.00)	1/8" to 3/16"	5/8"	1/4"
70° (.75 to 4.00)	1/8" to 3/16"	5/8"	1/8"
80° (.75 to 4.00)	1/8" to 3/16"	5/8"	1/8"
90° (.75 to 4.00)	1/8" to 3/16"	5/8"	0

Above 4.00 gph it may be advisable to increase dimension "C" by 1/8" to insure smooth starting

Wayne's line of high performance stainless steel and cast iron air cones makes for higher efficiency, lower emissions, lower nozzle temperatures and improved flame control to prevent smoke and soot build-up, which is an important feature, since soot can block efficient heat transfer and reduce efficiency.
